**2016 Funding priorities**

- Health Services
- Shelter Maintenance
- Protection
- Community Mobilization

**UNHCR Presence**

- 51 national staff
- 8 international staff
- 2 international volunteers

**Geographical Snapshot:**

Distance to national borders:
- Syria: 90 km, Iraq: 255 km, Saudi Arabia: 75 km

*Figures as per 30th April 2016*
TWO YEARS ON

Energy
- A comprehensive energy plan to connect electricity to every household is ongoing with the installation of the low voltage poles currently taking place. Once the project is completed, each shelter will have an allowance of 1kWh/day, enough power to operate lights, a refrigerator, television, a fan and charge phones. A solar power plant will also be installed in the camp this year to reduce the cost of electricity bills. In the meantime, UNHCR has installed 472 solar street lights and own an average of 4 solar lanterns per household.

Livelihoods
- Two market areas are operating in Azraq camp. The 100 shops opened - 50 owned by the refugees and 50 by the host community -, provide the camp with food shops, restaurants, accessories, bikes and many other items. In addition, UNHCR and its partners have set up an Incentive Based Volunteering (IBV) scheme, through which refugees play an active role in the functioning of the camp while earning some extra income.

Food Security
- Refugees receive 20JOD (equivalent to $28) per person every month from WFP in the form of an electronic voucher which can be used to buy food from the supermarket in the camp using the card-less WFP EyePay iris scanning system connected to UNHCR’s registration database. WFP also distributes 240 gr of bread daily to all refugees in the camp. Ready to eat meals are provided to refugees upon arrival and a school feeding programme is in place for students in the formal and informal schools.

Education
- There is one complex in the camp hosting Primary and Secondary schools which operates two shifts, one for girls in the morning and boys in the afternoon, with a capacity for 5,000 students. Currently, over 3,000 children are enrolled at the school. Informal and non-formal education is also available. There is one kindergarten with a capacity for 400 children. Furthermore, there are 4 child-friendly spaces with playgrounds and 4 adolescent-friendly spaces in the camp providing additional services.

Health
- 3 primary health care centers (PHC) operate in the camp, one comprehensive PHC in Village 6, one basic in Village 3 and one temporary in Village 5. PHCs are open from 9am to 4pm daily. Secondary level healthcare (medical surgical and maternity care) is available to refugees at the field hospital running 24 hour per day. Health and nutrition services are provided through UNHCR partners, including mental and reproductive health. An average of 20 babies per week was delivered this month, double the births as of Feb. 2016.

Water and Sanitation
- There is one new borehole in the camp with a capacity of 50m3/h which ensures good water quality and quantity control as well as better cost efficiency. The average water supply is 864 m3 per day. Water is distributed through the water supply network to 43 tap stands. The Waste Water Treatment Plant started receiving waste water from the camp.

Community Mobilization and Community Empowerment
- Community centers were established in 2014 in each village and facilitate vocational trainings, community gatherings and mass information activities by all agencies. 3 multipurpose sports-grounds are opened in the camp, offering additional sports activities for all age groups.

Targeting Persons with Specific Needs
- UNHCR and its partners provide psychosocial support to men, women, girls and boys in need. Special assistance is delivered to vulnerable groups such as single parent families and persons with disabilities. UNHCR works closely with its partners on child protection issues and to strengthen early identification, referral and response to sexual and gender-based violence (SGBV) cases.
