Refugee Access to Livelihoods and Housing, Land, and Property

May 2019
UGANDA

CONTEXT
Uganda is currently hosting the largest number of refugees in the region with over 1.2 million refugees and asylum seekers, primarily from South Sudan, the Democratic Republic of Congo (DRC), and Burundi. Recently arrived refugees have joined Rwandese, Somali, and other refugees that have lived in Uganda for decades. Due to the large number of refugees, the range of countries of origin, and the varying lengths of displacement, there are key information gaps on how access to or lack of housing, land, and property (HLP) for refugees impact their potential for sustainable livelihoods.

In partnership with Norwegian Refugee Council (NRC), REACH conducted an assessment from 3 December 2018 to 15 March 2019 to collect baseline data on refugees’ access to livelihoods and HLP. The assessment aims to provide a better understanding of the conditions of refugee access to livelihoods and HLP, the linkages, and other factors influencing sustainable livelihoods and potential movement within Uganda.

METHODOLOGY
A mixed methods approach was used, driven by a household-level structured survey, semi-structured key informant interviews (KIIs) and focus group discussions (FGDs). The quantitative household-level survey produced results representative for the refugee population in 30 refugee settlements (considered as 25 due to five combined settlements in Adjumani) across 11 districts, as well as select divisions of Kampala (Makindye, Kampala Central, and Kawempe) with a 95% confidence level and 10% margin of error at the settlement level for all questions asked to the entire sample size. A total of 3,165 households were interviewed for this assessment. All questions referring to a subset are footnoted.

KIIs and FGDs were used to triangulate the data and provide context to quantitative findings. KIIs targeted settlement leadership, including Office of the Prime Minister (OPM) commandants and UNHCR staff, refugee welfare committee leaders, district local government officials, and key partners working in relevant sectors. Semi-structured FGDs were stratified by gender and conducted with refugee and host community groups in each location.

Findings in this factsheet are representative of refugee households living in Maaji I, II & III refugee settlement. A total of 115 refugee households were interviewed in Maaji I, II & III.

Displacement demographic

Top countries of origin:
1. South Sudan (65%)
2. DRC (27%)
3. Burundi (3%)
4. Somalia (2%)

BRIEF OVERVIEW OF MAAJI I, II & III IN ADJUMANI DISTRICT

Originally established in 1997 to receive refugees fleeing the Second Sudanese Civil War, Maaji settlement II and III were re-opened in 2015 to host new refugee arrivals from South Sudan. While the settlement is no longer receiving new arrivals, humanitarian partners continue to support efforts to improve standards and services for refugees and the host community alike.

HHs WITH VULNERABLE MEMBERS

- Unaccompanied/separated child, orphan: 46%
- Disabled members: 66%
- Pregnant / lactating women: 34%
- Female-headed HHs: 88%

HHs reporting member with persons with specific needs (PSN) card: 61%

HHs reporting that some members are not registered as refugees: 8%

TOP 3 HLP CHALLENGES

- Property: 32%
- Housing: 29%
- Land accessed for housing: 28%

1 Figures based on United Nations High Commissioner for Refugees (UNHCR) and Office of the Prime Minister (OPM) population figures updated as of April 2019.
2 This question was only asked to the 71% of respondents facing HLP challenges. The level of confidence may thus be lower than 95%.
3 Respondents could answer more than one option for this question.
TENURE ARRANGEMENTS

% of HHs by shelter tenure:
- 87% Owned by the head of the household
- 7% Owned by the spouse
- 4% Owned jointly between household members
- 1% Owned by other family members (rent free)
- 1% Owned by neighbors (rent free)

0% of HHs have documentation proving ownership or legal occupancy of shelter.

% of HHs by methods of shelter acquisition:
- Construct: 100%
- Acquire: 0%

Of the 100% of HHs that reported constructing their shelter, most commonly reported ways of acquiring materials:
- Nature: 82%
- Purchased: 64%
- Friend: 10%

SHELTER CHALLENGES

80% of HHs reported shelter damage. Of those, the most commonly reported parts of the shelter damaged are:
- Damage to roof: 95%
- Damage to windows and/or doors: 20%
- Damage to wall material: 9%

51% of HHs reported not being able to conduct repairs. Of those, the most commonly reported reasons include:
- No money for repair: 86%
- Material not available: 62%

% of HHs reporting members do not feel safe in their current shelter:
- Female: 30%
- Male: 32%

LAND

ACCESS TO LAND

% of HH reporting:
- Accessing land where shelter is located: 99%
- Accessing land in a separate plot: 17%

Method of accessing land around shelter plot:
- 99% OPM/UNHCR allocation
- 1% Accessing someone else's land for free

17% of HHs reported accessing land outside their shelter. Of those, the most commonly reported methods of accessing that land are:
- Renting to access someone else's land: 84%
- Accessing someone else's land for free: 16%

USE OF LAND FOR CULTIVATION

83% of HHs reported using their shelter plot for cultivation. Of those, the following reported on sufficiency of the land to provide food for the HH in the most recent harvest:
- 99% Insufficient
- 1% Sufficient

FORMAL AGREEMENTS

Of the 1% that access land around shelter plot through renting, free access, or ownership, 0% of HHs that have a formal agreement to access the land

Of the 100% of land accessed outside of shelter plot through renting, free access, or ownership, 12% are accessed through formal agreement

---

4 The Government of Uganda allocates land for residential and agricultural purposes, to refugees, irrespective of ethnicity and origin. This is done via OPM with the support of UNHCR.
**HLP Challenges**

71% of HHs reported facing HLP challenges. Of those:

Most commonly reported areas of HLP issues (% of HLP issues):³

- Property: 32%
- Housing: 29%
- Land accessed for housing: 28%

Most commonly reported types of HLP issues (% of HLP issues):³

- Theft: 37%
- Plot given was unusable: 35%
- Destruction: 14%

**HLP ISSUE RESOLUTION**

42% of the 96 HLP issues reported were attempted to be resolved by the household.

Out of the HLP issues that HHs attempted to resolve, the following mechanisms were used:³

- Refugee Welfare Committee: 58%
- Help desk: 44%
- Local clan/traditional leaders: 29%

30% of the HLP issues reported were resolved.

**PROPERTY**

28% of HHs reported having no property at all. Out of the 72% who do:

HHs with income-generating property: 21%

Most commonly reported type of property:

- Livestock: 60%
- Solar panel: 27%
- Bicycle: 12%

97% of property items are owned by one owner.

Proportion of those by sex of owner:

- Female: 68%
- Male: 32%

9% of HHs that own property/assets reported having documentation proving ownership or legal access.

% of HHs owning number of income-generating property items:

- 79% Zero income-generating items
- 17% One income-generating item
- 3% Two income-generating items
- 1% Three income-generating items

**ACCESS TO INFORMATION**

Most commonly reported sources and types of information HHs access:³

- Source
  - Refugee Welfare Committee: 53%
  - Family and friends: 47%
  - NGO: 40%

- Type of information
  - Food distribution: 91%
  - Registration: 62%
  - Availability of services: 51%

96% of HHs reported trusting the information they receive.

Most commonly reported information needs of HHs by area:³

- Food distribution: 62%
- Availability of services: 47%
- Employment opportunities: 31%
LIVELIHOODS SOURCES
Out of the 96% of HHs who reported having a source of income, the most commonly reported sources are:

- Cash assistance 57%
- Remittances 24%
- Selling assistance 24%

Most commonly reported livelihood groups HH members participate in:

- Village Savings and Loan Associations 61%
- Farmers’ group 4%
- Farmer field school (FFS)/Pastoral Field School (PFS) 3%

Most commonly reported livelihood challenges:

- Lack of work opportunities 69%
- Lack of credit to start/continue a business 66%
- Lack of skills/qualifications 50%

SKILLS AND ASPIRATIONS
82% of HHs have men of working age and 93% of HHs have women of working age. Of those:

Most commonly reported livelihoods skills gained in country of origin:

- Farming 80%
- Domestic work in the home 72%
- Casual labour 32%
- Farming 63%
- Livestock 29%
- Street trade 25%

Most commonly reported livelihood aspirations:

- Farming 29%
- Tailoring 31%
- Driving 25%
- Domestic work in the home 29%
- Health worker 19%
- Hairdressing 26%

MOVEMENTS WITHIN UGANDA

PAST MOVEMENTS
% of HHs that had at least one member move in the year prior to data collection:

- 15%

Types of destinations:

- Urban Area 47%
- Rural Area 29%
- Another refugee settlement 17%

Most commonly reported reasons for moving:

- Joining other family members 59%
- Presence of education services 42%
- Availability of local food 18%

MOVEMENT INTENTIONS
% of HHs that have at least one member planning to move in the 6 months following data collection:

- 2%

Types of destinations:

- Urban Area 55%
- Rural Area 45%
- Another refugee settlement 55%

Most commonly reported reasons for planned movement:

- Presence of employment opportunities 45%
- Other 45%
- Presence of education services 11%
