As the conflict in Sudan continues and in light of the number of people having already fled to Chad, the Chadian Government estimates that up to 600,000* refugees and returnees could arrive in Chad by the end of 2023.

### Individual biometric registration

- Gaga, Farchana, Abéché, Oure Cassoni, Iridimi, Ourang, Adré & Kounougou camps
- Registered: 79,064
- Households: 14,227
- Registered are women & children: 85%
- Registered have specific needs: 10%

### Age and gender breakdown of registered persons

- Male: 56%
- Female: 44%
- 0-4: 14%
- 5-11: 6%
- 12-17: 12%
- 18-59: 24%
- 60+: 2%

### Registered persons with specific needs

- Woman at risk: 1,737
- Single parent: 1,394
- Child at risk: 1,038
- Older person at risk: 837
- Unaccompanied or separated child: 771
- Disability: 638
- Medical condition: 127

### Migrants Returnees arrivals

- Estimated: 62,300
- Returnees are women & children: 93%

---

**Context**

Since the beginning of the conflict in Sudan on 15 April 2023, the CNARR, UNHCR, and IOM have been registering an influx of Sudanese refugees and Chadian returnees from Darfur through over 32 border entry points in eastern Chad. In the provinces of Ouaddai, Sila, and Wadi Fira humanitarian teams are working in support of the Chadian Government and local authorities to provide reception, protection, and address to most urgent humanitarian needs of refugees in spontaneous settlements. UNHCR has relocated 42% refugees away from spontaneous border sites to existing and newly established camps. Host populations are benefitting from the establishment and/or strengthening of services in host villages.

The relocations are only carried out from host villages to the camps.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
The Project 21 is a regional protection monitoring system, launched in 2020 to address gaps in data collection and analysis on protection in West and Central Africa. The inter-agency project mobilizes partners to collect a set of data using harmonized tools and a common methodology to generate joint analysis of the situation, risks, and protection trends. As of 11 September 2023, 5,457 newly arrived refugees have been interviewed in Chad for the Sudanese emergency. This represents a subset of the collected data.
