Treatment of SAM (Severe Acute Malnutrition)

Camp Management is done by ARRA with support from UNHCR.

Camp Coordination Meetings, co-chaired by ARRA and UNHCR, are held weekly in Kobe Camp with humanitarian actors.

All refugees in Kobe Camp are individually registered in UNHCR’s proGres database and hold ration cards. Ration card numbers are useful for referral between partners and for distribution events. By end 2011, refugees will have been given a Proof of Registration document showing family-related and individual details, including each person’s photo.

Biometrics (fingerprinting) has been used for registering refugees living in Kobe. Biometrics assists in preventing double registration. No refugee household should have more than one ration card.

UNHCR provides protection and monitors delivery of services to all refugees in Kobe.
