

Measle and polio Vaccination, Za'atari, French camp Begining : Sunday 18th November

Friday 21th December: 3566 vaccinated children since the beginning

Figure 1: Number of the daily vaccinated children

Sunday 16/12, vaccination staff met the school director for its participation to diffuse messages about the vaccination campaign.
 Monday 17/12, UNICEF puts posters (about campaign and routine vaccination) at health providers caravans and in the school. UNICEF gave flyers on campaign and routine vaccination to the health providers presents during the health coordination meeting.

The distribution of the gender by class of age doesn't vary significantly ($p=0,9$).
