

IOM Regional Response to the Syria Crisis

17 January 2013

This report is produced by the International Organization for Migration (IOM) on its humanitarian response for the crisis in Syria. The summary covers events and activities until 17 January 2013. For activities implemented in Syria, please consult the full situation report.

- **Jordan:** IOM organized a visit of the border areas, a transit centre and Za'atri Camp for **17** foreign officials.
- **Lebanon:** To date, IOM distributed a total of **11,699** rechargeable lamps, **141** diaper bags, **1,667** house cleaning kits, **15,776** shelter support items, **5,140** hygiene kits and **49,868** winter kits to **44,803** Syrian refugees and **39,489** Lebanese returnees.
- **Iraq:** To date, IOM has distributed a total of **5,651** NFI kits to **25,488** Syrian refugees residing in camps; and **46** NFI packages to **265** Iraqi returnees. A **45,000**-litre water tank has been installed in the Alkasek Camp in Ninewa.

SITUATION OVERVIEW

JORDAN

There are currently **131,113** registered Syrian refugees in Jordan¹. The Jordanian government estimates that over **200,000** Syrians have entered the country since March 2011.

The movement of Syrian refugees crossing the border into Jordan decreased to **3,078** in the past week, from **3,927** during the previous reporting period. Severe weather conditions across the region may have contributed to this outcome.

Refugees continue to cross the border into Jordan; plans are underway to open a second camp in Zarqa by February 2013. OCHA reports that although humanitarian agencies have helped hundreds of thousands of people with basic relief items, including blankets, mattresses, cooking sets, hygiene items, drugs and medical supplies, the aid is rapidly outpaced by ever growing needs due to cold weather conditions.²

Harsh weather conditions caused the displacement of groups of refugees within Za'atri camp. Heavy rainfall flooded some shelters, while some tents were blown away by strong wind. Efforts to salvage tents and construct barrier walls with mud did little to prevent flooding of shelter areas. Refugees, frustrated at the standards of living in the camp, attacked aid workers with sticks and stones after tents collapsed due to the weather events. Humanitarian actors are working with the community to improve conditions.

General Brigadier Al-Zwahiri, has been appointed as the as the Administrator of the refugee camps within Jordan. At a donor meeting convened by the Government on 17 January, IOM commended the Government's efforts and offered support and expertise to assist the Government with managing Al-Habat - a new refugee camp constructed within Zarqa prefecture that has the capacity to host **5,500** refugees.

LEBANON

Over **139,000** Syrian refugees are registered with UNHCR in Lebanon; a further **55,000** are scheduled to be registered. The pace of refugees entering Lebanon remains steady with the largest population settling in North Lebanon (**70,751**), followed by Bekaa (**53,351**), Beirut and South Lebanon (**15,173**).

In early January, the Government plan to respond to the influx of refugees was approved by Cabinet. The plan lists measures to protect and support Syrian refugees. The plan also includes provisions for the Higher Relief Commission (HRC) to assist Lebanese returnees. The Cabinet's decision has been well received and marks a step towards Government ownership of the response.

IRAQ

The numbers of refugees arriving is on the rise. Since mid-December, the number of Syrian refugees in Iraq has risen by over **6,432** to **72,480**.³

Due to civil unrest and demonstrations in Anbar, Ninewa, and other governorates of Iraq, all border crossings into Iraq are now closed to Syrian refugees (as of 13 January), including the Treebil Border crossing on the border with Jordan. Authorities are unclear as to when they will reopen the borders to refugees however returnees are still allowed to cross into Iraq.

During the period 26 December to 8 January, **155** returnee households (**930** individuals) registered with the Ministry of Migration and Displacement (MoMD). Since July 2012, **6,000** Households (**36,342** individuals) have registered for assistance. Priority needs of returnees include: NFIs, food, legal assistance, shelter, and access to employment and education.

TURKEY

On 12 January, the Government of Turkey reported that the total number of Syrians registered and accommodated in **14** camps in **7** provinces has increased to **153,307** individuals. During the reporting period, the Government registered **3,266** new arrivals and **1,560** individuals who returned voluntarily to Syria. The Government ensured that access roads to the camps remained open despite heavy snow in Adiyaman and Gaziantep provinces. The Government is addressing the issue of shortage of shelter and will open the Nizip 2 camp (a container site) by the end of January.

IOM COUNTRY OPERATIONS

1. Jordan Operations

Emergency Transportation of Refugees

Transportation Assistance provided from 9 to 16 January 2013	
Date (2013)	No. Assisted
9 January	107
10 January	102
11 January	180
12 January	200
13 January	569
14 January	821
15 January	1,099
7-day Total⁴	3,078

In the past week, IOM facilitated the transport of **3,078** Syrian nationals. Since 29 July 2012, IOM facilitated the transport of **89,659** Syrians from border areas to Za'atri Camp.

IOM provides pre-registration and reception services to beneficiaries requiring transport. During pre-departure medical screening IOM health teams identify and make referrals to health providers upon arrival at the Camp.

During the reporting period, IOM teams were on hand to provide emergency assistance to new arrivals that were affected by the severe weather conditions.

UNHCR allocated temporary accommodation in prefabs for refugees whose tents were damaged during the rain. IOM provided transportation assistance to refugees wishing to relocate to these shelters within the Camp.

Ensuring sufficient shelter for new arrivals and camp residents remains a concern and IOM attended a meeting convened for UN Agencies on 9 January where this was discussed. Partners are keen to resolve this issue as increased protests across the camp could result in limited access for humanitarian workers.

⁴ Dates reflect evacuation statistics collected the day of and night before the date stated.

Health Services

In the past week, IOM teams referred **9** individuals with medical conditions requiring immediate referral or treatment at the camp's health clinics, these individuals were identified during the pre-departure medical screening. This brings the total referrals to date, to **892** since 29 July 2012.

IOM has been implementing a Tuberculosis (TB) screening and awareness-raising program for the past ten months. Since March 2012, IOM screened **72,158** Syrian refugees for TB and provided **46,458** Syrians with TB awareness-raising activities within Za'atri Camp, transit centres, and host communities in Jordan. To date, IOM medical staff has identified and confirmed **35** TB cases and the Organization is providing follow-up treatment for **32** cases. IOM teams are closely monitoring individuals that have come into contact with those infected with TB.⁵

Strengthening Inter-Agency and Inter-Government Cooperation

On 16 January, IOM organized a visit for officials from 17 embassies, who observed IOM operations at the border, the transit centre, and Za'atri Camp. A new visit is to be organized for early February.

2. Lebanon Operations

Provision of Emergency Non-Food Items (NFIs)

During the reporting period, IOM teams monitored the welfare of returnees and refugees that were affected by the extreme weather events. In accessible areas, staff provided extremely vulnerable households with additional blankets and quilts. IOM staff identified an immediate need to distribute plastic sheeting to enable vulnerable households to waterproof their shelters.

From 17 to 31 December 2012, IOM distributed **4,784** blankets, **6,135** quilts, **800** mattresses, **562** pillows, **1,650** floor tarpaulins and **500** plastic sheeting to benefit an estimated **1,492** Lebanese returnee families and **997** Syrian refugee families in Akkar Governorate in North Lebanon.

3. Iraq Operations

Provision of Emergency Non-Food Items (NFIs)

IOM teams in Iraq are reporting that the cold weather experienced in the country over the reporting period is increasing the need for NFI winterization kits, food items, and clothes. For those refugees that are living with relatives or within host communities, specific needs include: mattresses, blankets, pillows, plastic mats, kerosene heaters, stoves, kitchen supplies, soap and cleaning products, and rechargeable lights.

⁵ 15 cases and their contacts are followed by IOM medical team under the leadership of the Hashemite Kingdom of Jordan Ministry of Health (MOH) through the national TB program (NTP) procedures, guidance, rules and regulations and in coordination with the United Nations Country Team (UNCT). Dr. Khaled Abu Rumman (NTP Manager and Director of Chest Diseases Directorate) leads the national program in coordination with the TB directorates in Irbid and Mafraq and the Anoor Sanatorium.

During the reporting period, IOM has been engaging in inter-agency planning for an estimated **20,000** new arrivals to Northern Iraq predicted to arrive in the coming months.

To date, IOM has distributed a total of **5,651** NFI kits to **25,488** Syrian refugees residing in camps and **46** NFI packages to **265** Iraqi returnees.

Water and Sanitation

The construction of the **45,000**-litre water tank, which began in late November 2012, has been completed in Alkasek Camp in Ninewa. An estimated **100** beneficiary

families are set to benefit from the fresh water supply.

4. Turkey Operations

IOM continues to engage with humanitarian partners to support the Government in its efforts to meet the rising needs of the refugees across the **14** camps. IOM participated in an inter-agency health assessment in late 2012 (4-5 December), the assessment findings are currently under revision and will be shared with relevant authorities in the coming weeks.
