The information presented cannot be guaranteed as an exhaustive picture of the situation as it is not based on a census of the refugee population. The geographic representation should be interpreted with caution as their interpretation largely depends on an unknown population size at the “Basic Service Unit” level. The present map reflects a snapshot at a given time that may not be valid for case based decisions.

The data presented in this assessment can be used to discover characteristic patterns but is not legally valid for case based decisions.
