The information presented cannot be guaranteed as an exhaustive picture of the situation as it is not based on a census of the refugee population. The locations and households depicted here should be interpreted with caution as their interpretation largely depends on an unknown population size at the BSU level. The present map reflects a snapshot at a given time and is not validated against the refugee population size. Thus, the data from this assessment can be used to discover characteristic patterns but is not legally valid for case-based decisions.
