The information presented cannot be guaranteed as an exhaustive picture of the situation as it is based on a census of the refugee population. The predominant types displayed here should be interpreted with caution as their interpretation largely depends on an unknown population size at the 'Basic Service Unit' level. The present map reflects a snapshot at a given time and as perceived by the refugee community. Thus, the data from this assessment can be used to discover characteristic patterns but is not legislatively valid for case-based decisions.
