This map illustrates satellite-detected shelters and other buildings at the Al Zaatari refugee camp in Mafraq Governorate, Jordan. As of 1 January 2014 a total of 28,093 shelters were detected as well as 1,728 infrastructure and support buildings within the 321.9 hectares of the camp. Between 30 September 2013 and 7 January 2014, a total of 4,982 shelters opened or were measured and a total of 6,868 shelters were constructed, and the number of shelters has thus increased by about 2.17% since the previous UNITAR/UNOSAT assessment. This indicates an approximate 8.4% increase in the number of shelters between 30 September 2013 and 7 January 2014. This is a preliminary analysis and has not yet been validated in the field. Structure locations subject to a spatial error margin of +/- three meters. Shelters grouped under plastic sheeting were estimated by average household sizes and may be a source of error. Please send ground feedback to UNITAR/UNOSAT.
