UNHCR refugee population maps

- Refugee population by district
UNHCR refugee population maps

- Refugee population by cadastral

Beirut
Data Portal (Information Sharing Portal)

“251 Most Vulnerable Cadastrals”, March 2015

Calculation of the Most Vulnerable Localities is based on the following datasets:

1 - Multi-Deprivation Index (MDI)

The MDI is a composite index, based on deprivation level scoring of households in five critical dimensions:

   i - Access to Health services;
   ii - Income levels;
   iii - Access to Education services;
   iv - Access to Water and Sanitation services;
   v - Housing conditions;

MDI is from CAS, UNDP and MoSA Living Conditions and Household Budget Survey conducted in 2004.

2 - Lebanese population dataset

Lebanese population data is based on CDRI 2002

3 - Refugee population figures

The refugee population includes all registered Syrian refugees, PRL and PRS. Syrian refugee data is based on UNHCR registration database as of November 2014 and Palestine refugees data is based on 270,000 AUB/UNRWA figure (PRL as of 2011 and PRS 2014).

251 Most Vulnerable Cadastres
87% Refugees
67% Deprived Lebanese
Lebanon **Map Hub** is the go-to place for dynamic maps related to the Syria Crisis Response in Lebanon; it hosts various thematic maps that highlight particular issues like economic vulnerabilities or out of schools children.

Assessment Registry

Assessment Registry Form

- Allows you to submit a new assessment to the assessment registry of the interagency response in Lebanon.

List of all registered assessments

- Facilitates planning and utilization of existing information
- Helps coordination of activities
- Lessens duplication and assessment fatigue
Factbook is a searchable repository of interesting facts and figures related to the response. For example, search for “poverty” and you get all facts related to that subject.
