### UNHCR Presence

- 52 national staff
- 6 international staff
- 2 international volunteers

### 2017 Funding priorities

- Health
- Shelter
- NFI
- Protection

### Geographical Snapshot:

**Distance to national borders:**  
- Syria: 90 km
- Iraq: 255 km
- Saudi Arabia: 75 km

Map: UNOSAT

*Figures as per 31st March 2017*
TWO YEARS ON

Energy

- A comprehensive energy plan to connect electricity to every household is ongoing. As of 1st February, all the shelters in villages 3 and 6 have been connected to the grid providing electricity to over 15,000 refugees. Each shelter has an allowance of 1kWh/day, enough power to operate lights, a refrigerator, television, a fan and charge phones. UNHCR has distributed an average of 4 solar lanterns per household which provide with light the rest of the households. A solar power plant is currently being installed in the camp to reduce the cost of electricity bills.

Livelihoods

- Two market areas are operating in Azraq camp. The 200 shops - 100 owned by the refugees and 100 by the host community - provide the camp with food shops, restaurants, accessories, bikes and many other items. In addition, UNHCR and its partners have set up an Incentive Based Volunteering (IBV) scheme, through which refugees play an active role in the functioning of the camp while earning some extra income. Vocational and skills trainings are being provided in the camp by partner organisations.

Food Security

- Refugees receive 20JOD (equivalent to $28) per person every month from WFP in the form of an electronic voucher which can be used to buy food from the supermarkets in the camp using the card-less EyePay iris scanning system, connected to UNHCR’s registration database. WFP also distributes 240 gr of bread daily to all refugees in the camp. Ready to eat meals are provided to refugees upon arrival and a school feeding programme is in place for students in the formal and informal schools.

Education

- This academic year saw the opening of new Primary and Secondary schools to guarantee access to education for all children in the camp. Schools operate two shifts, one for girls in the morning and boys in the afternoon. So far, over 10,200 students are enrolled at the school. In addition, 11 Makani Centres provide learning support to boys and girls. Kindergarten facilities and day care activities are also available in the camp. Over 6,000 students are registered in the new school transportation programme.

Health

- 3 primary health care centers (PHC) operate in the camp, one comprehensive PHC in Village 6, one basic in Village 3 and one temporary in Village 5. PHCs are open from 9am to 4pm daily. Secondary level healthcare (medical surgical and maternity care) is available to refugees at the field hospital running 24 hour per day. Health and nutrition services are provided through UNHCR partners, including mental and reproductive health. An average of 33 babies per week was delivered this month.

Water and Sanitation

- There is one new borehole in the camp with a capacity of 58m3/h which ensures good water quality and quantity control as well as better cost efficiency. The average water supply is 950 m3 per day to the camp. Water is distributed through the water supply network to 76 tap stands.

Community Mobilization and Community Empowerment

- Community centers were established in 2014 in each village and facilitate vocational trainings, community gatherings and mass information activities by all agencies. Multipurpose sports-grounds in the camp offer additional sports activities for all age groups. Launched in March 2017, the camp published with its own magazine “The Heartbeat of the camp”, an initiative conceived and led by a group of young boys and girls.

Targeting Persons with Specific Needs

- UNHCR and its partners provide psychosocial support to men, women, girls and boys in need. Special assistance is delivered to vulnerable groups such as single parent families and persons with disabilities. UNHCR works closely with its partners on child protection issues and to strengthen early identification, referral and response to sexual and gender-based violence (SGBV) cases.
