The interagency winter support plan was concluded end of March 2016 with a high implementation rate. 33 partners supported 252,364 poor households living in cold areas with cash, vouchers, blankets, stoves, and clothing kit assistance. Shelter and WASH partners provided weatherproofing and drainage kits, and improved site conditions in informal settlements and substandard buildings as well. Compared to last year, this year’s plan was better funded. $107M were secured out of $117M needed to cover the winter needs of 257,257 households identified country wide.
**FACTS / FIGURES**

- **98%** Implementation rate
