## Update on achievements

**UNHCR in Somalia started with the Assisted Spontaneous Returnee (ASR) program aimed** at assisting Somali refugees in Yemen to return to Somalia. Returnees who decided to be voluntary repatriated are entitled to receive an enhanced return package<sup>4</sup> at their final destination.

**UNHCR Somalia met with UNHCR Kenya in Dadaab, at the Somalia-Kenya cross-border meeting.** Health, education and housing were identified as the key sectors that require a more strategic approach in term of assisting returnees. Kenyan authorities confirmed that road convoys will remain suspended until such time as a security assessment can be conducted.

**A team of 11 Somali refugees from the refugee camp in Kakuma (Kenya) conducted a four-day Go and See visit to Somalia.** The team observed the repatriation assistance for Somali refugees as delivered in Somalia and reported back to the Somali refugee population in Kakuma to enable them to make a voluntary and informed decision about their return to Somalia.

**The final components of the initial pilot of an updated post-returns monitoring system** were put in place for implementation in October through a consortium of implementing partners. The updated system will provide much-needed data on progress towards reintegration for returning refugees, establishing an evidence base for UNHCR Somalia to provide more targeted, area-based assistance to support sustainable reintegration.
