<sup>1</sup>UNHCR and Operational Partners.

<sup>2</sup>Actual capacity is calculated as the subtraction of current places minus 13% which is this week's estimated average natural loss. Natural loss is the number of places that cannot currently be used because of damages/repairs, protection issues, family size, etc. The formula applies to all type of accommodation.

Actual capacity is a close estimate of available places to be used as reference.

<sup>3</sup>Occupancy rate is calculated as the percentage of current population over actual capacity.

\*Based on a full headcount as of 03.11.2017, the actual available capacity was estimate to be lower at 1,210. This can be used for immediate planning.
