### 2 Diseases & Trends

#### Key Acute Health Conditions
- **Upper Respiratory Tract Infection (URTI)**
- **Urinary tract infection**
- **Skin Infection**
- **Lower Respiratory Tract Infection (LRTI)**
- **Eye Infection**

Proportion of upper and lower respiratory infections has not changed during the month of March. It is noteworthy to mention that upper respiratory tract infections are the most common acute health conditions with 25% of acute consultations being for this reason. Proportions of skin infection consultations have slightly decreased compared to February. Finally, proportions of urinary tract infections have inclined compared to February.

#### Key Chronic Health Conditions
- **Hypertension**
- **Diabetes**
- **Asthma**
- **Cardiovascular disease**
- **Ischaemic heart disease**

During the month of March, hypertension constituted 29% of all chronic consultations. Trends in chronic health conditions vary due to clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate therapeutic outcomes which necessitates enhanced accessibility of those morbid diseases to the health care facility.
