Humanitarian WASH Sector Coordination Meeting

Peter Kakuru

*Nakivale Refugee Settlement, Isingiro District*
June 8, 2017

IMPLEMENTING PARTNERS

*Nsamizi Training Institute for Social development*
*American Refugee Committee International (ARC)*
Nakivale Settlement

- Surface Area: 71.4 sq. miles (185 sq. km), 86 villages
- Current refugee population: 121,987 Persons
- Estimated host population: 20,000 persons
- Daily water supply – 1,746,000 litres per day (out of which 80% is drawn from lake Nakivale)
- 93 tap stands, with 474 taps and 55 hand pumps
- Cost of water production currently very high (Approx: 700,000 USD per year)
## Progress of WASH response against targets/indicators

<table>
<thead>
<tr>
<th>Impact Indicator</th>
<th>Progress</th>
</tr>
</thead>
<tbody>
<tr>
<td>Av. # of Litres of portable water available per person per day</td>
<td>19.6 L/D/P</td>
</tr>
<tr>
<td># of persons of concern per usable well/hand pump</td>
<td>3737</td>
</tr>
<tr>
<td># of persons of concern per water tap</td>
<td>245</td>
</tr>
<tr>
<td>% of households with specific place for hand washing</td>
<td>5%</td>
</tr>
<tr>
<td>% of households with drop-hole latrine</td>
<td>90.2%</td>
</tr>
</tbody>
</table>
Sector coordination arrangements in the field

- Camp Level coordination meetings that are carried out every fortnight and attended by all agencies

- Inter agency coordination meetings on field level between WASH partners (ARC and Nsamizi) and UNHCR
Gaps and Challenges

- Increasing Pollution of the lake that contributes to more than 80% of the water that is treated for refugees in Nakivale

- Balancing production versus storage leading to water rationing and also water tracking

- Limited funds to expand pipeline water systems to cater for extensions in host communities (for ReHOPE) and other parts of settlement.

- 51% of households do not have access to drinking water storage containers directly affecting safe water sourcing.

- Pupils per latrine is currently at 1 stance : 79 pupils against 1:50
Plans for 2017

- Phase-out of water trucking in at least 6 villages on trucking schedule in the year 2017.

- Water supply infrastructure development in refugee & host communities for peaceful co-existence including further extension of piped water systems

- Construction of Institutional latrines in schools

- Promotion of new innovative technologies/methodologies sanitation, water quality technologies.

- Promotion of water as an economic good – PPP approach in line with National system

- Strengthening Community contribution for management of water systems – in line with National system

- More involvement of National Water and Sewerage Cooperation and the DLG in the sector operations at Camp level
Thanks!
