**MAIN ACTIVITIES**

### Health
- Health services are available through health centres and community health system for refugees and host communities including:
  - Curative care consisting of outpatient and in-patient medical care; and referral of complicated medical cases
  - Maternal & child care comprised of antenatal, postnatal, family planning, maternity care and vaccination services for children
  - Care and treatment of HIV and HIV related opportunistic infections services
  - Community-based health promotion and disease prevention, including distribution of mosquito nets
  - Integrated mental health services and psychosocial counseling
  - Health and nutrition screening of new arrivals at the reception center
  - Pre-departure medical screening/Medical escorts during RST and during relocation from border areas

### Nutrition
- With support from UNHCR’s partners, refugees have access to infrastructure and receive nutritional support, including:
  - Community management of acute malnutrition programs for treatment of severe and moderate acute malnutrition
  - Infant and young child feeding programs
  - Provision of blanket supplementary food ration for specific vulnerable groups
  - Forums that provide information to increase awareness on appropriate nutrition practices

### WASH
- Refugees have access to 19 litres of potable water per person per day.
- Household sanitary facilities/latrines are available in the camp
- Environmental health and hygiene campaigns are implemented in the camp

### Protection & Community Services
- UNHCR and its partners provide protection to refugees and promote durable solutions to their plight through:
  - Establishment and ensured functioning of community based child protection structures, notably for UASC
  - Provision of prevention and response services for children at risk, and capacity development on child protection
  - Enabling and sustaining community participation in SGBV prevention and response through capacity development
  - Provision of specific services to persons with specific needs
  - Resettlement to third country of asylum and facilitated process of family reunification
  - Registration and monitoring

### Shelter
- Transitional and emergency shelters have been built and are regularly maintained.

### Core Relief Items
- Core Relief Items - sleeping mats, kitchen sets, soap and sanitary materials - are distributed to refugees.

### Logistics & Site Planning
- Refugees are transported and relocated from border areas and within camps. In addition, the camp layout is conducted.

### Education
- Facilitating refugee and host community school enrolments and continued support to all schooling levels (ECCE, Primary, Secondary, Tertiary and Adult Literacy).

### Environment & Energy
- Installation and maintenance of solar street lights for refugees and host community
- Distribution of solar home systems to beneficiaries selected among persons with specific needs
- Installation of mini-grids with business approach to support energy cooperatives
- Training of solar technicians and establishment of energy cooperatives

### Food
- On a monthly basis, food is supplied, transported and distributed to all refugees.

### Livelihoods
- UNHCR and IPs support refugee and host communities through implementation of projects in the agriculture and livestock sectors and provision of access to financial services and skills development
  - Self-management committees use market-oriented approaches to provide milk and meat selling services
  - Community Animal Health Workers provide veterinary services to animal owners
  - Refugee and host community members utilize microfinance services provided by REST/Dedebit
  - Refugee and host community youth are supported through vocational training in various trades
