2,771 patients received at the clinic in the month of February. 58 referrals to the hospitals in Jordan in the month of February. 47% of secondary and tertiary referrals were for obstetrics & gynaecology.

1 Accessibility

- **November**: 3,358 patients, 160 during the month, 57% daily average
- **December**: 4,350 patients, 174 during the month, 56% daily average
- **January**: 3,398 patients, 131 during the month, 57% daily average
- **February**: 2,771 patients, 126 during the month, 58% daily average

Age breakdown:
- **November**: 27% below 5, 14% 5 to 18, 25% 18 to 59, 14% above 60
- **December**: 25% below 5, 17% 5 to 18, 25% 18 to 59, 4% above 60
- **January**: 26% below 5, 14% 5 to 18, 25% 18 to 59, 3% above 60
- **February**: 24% below 5, 15% 5 to 18, 25% 18 to 59, 3% above 60

Gender breakdown:
- **November**: 27% male, 73% female
- **December**: 29% male, 71% female
- **January**: 27% male, 73% female
- **February**: 29% male, 71% female

2 Diseases & trends

Key Acute Health Conditions
- Upper Respiratory Tract Infection (URTI)
- Urinary tract infection
- Skin Infection
- Lower Respiratory Tract Infection (LRTI)
- Watery Diarrhea

During the month of February 2019, upper respiratory tract infection (URTI) was the highest reported acute health condition, with a proportional morbidity of 35%. There is a marked increase in reported lower respiratory tract infection (LRTI) cases. There was a slight decrease in reported eye infection and urinary tract infection (UTI), whereas there was a slight increase in reported watery diarrhea during February in comparison to previous months.

Key Chronic Health Conditions
- Hypertension
- Diabetes
- Asthma
- Cardiovascular disease
- Ischaemic heart disease

During the month of February 2019, hypertension, diabetes and asthma were the highest reported chronic health conditions with a proportional morbidity of 18%, 19% and 20% respectively. Trends in chronic health conditions vary as a result of clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate therapeutic outcomes which necessitates enhanced accessibility of those morbid diseases to the health care facility.
