Age breakdown

- January: Below 5 - 25%, 5 to 18 - 14%, 18 to 59 - 57%, Above 60 - 4%
- February: Below 5 - 24%, 5 to 18 - 15%, 18 to 59 - 58%, Above 60 - 3%
- March: Below 5 - 27%, 5 to 18 - 13%, 18 to 59 - 56%, Above 60 - 3%
- April: Below 5 - 27%, 5 to 18 - 16%, 18 to 59 - 54%, Above 60 - 3%

Gender breakdown

- January: Male - 27%, Female - 73%
- February: Male - 29%, Female - 71%
- March: Male - 27%, Female - 73%
- April: Male - 27%, Female - 73%

2 Diseases & trends

Key Acute Health Conditions

- Upper Respiratory Tract Infection (URTI)
- Urinary tract infection
- Skin infection
- Lower Respiratory Tract Infection (LRTI)
- Watery diarrhea

During the month of April 2019, upper respiratory tract infection (URTI) was the highest reported acute health condition with a proportional morbidity of 34%. There was a slight decrease in reported lower respiratory tract infection (LRTI) cases during April in comparison to previous months. No significant changes in the trends of other acute health conditions.

Key Chronic Health Conditions

- Hypertension
- Diabetes
- Asthma
- Cardiovascular disease
- Ischaemic heart disease

During the month of April 2019, asthma, hypertension and diabetes were the highest reported chronic health conditions with a proportional morbidity of 22%, 17% and 10% respectively. Trends in chronic health conditions vary as a result of clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate therapeutic outcomes which necessitates enhanced accessibility of those morbid diseases to the health care facility.
