Administrative Boundaries in Lebanon

Lebanon is divided into 8 Governorates…
Administrative Boundaries in Lebanon

...which are subdivided into 26 districts.
Administrative Boundaries in Lebanon

Districts are divided into approx. 1,010 municipalities.
Administrative Boundaries in Lebanon

Of these 1,010 municipalities, 696 are in unions of municipalities (UoMs). There are 48 UoMs.
There are 1,643 cadastrals…
Administrative Boundaries in Lebanon

...and approx. 2,742 towns, villages, localities
**P-CODES**

Governorate (i.e.: Bekaa)

District (i.e.: Baalbek)

Cadastral (i.e.: laat)

Site category

Number in the cadastral

0... Shelter Types
- 01: IS (Informal Settlement)
- 04: CS (Collective Shelter)

3... Public Health Type
- 31: PHC (Primary Healthcare Centre)
- 32: SHC (Secondary Healthcare Centre)

5... Education Type
- 56: Technical School

**Education sector:** uses CERD numbers instead (Public Schools: 1 to 4,999, Free Private Schools: 5,000 to 6,999, Private Schools: 7,000 to 9,999)
Lebanon Information Hub

Data Portal
The main gateway to operational data

Map Hub
Dynamic maps of the response

ActivityInfo
The platform all organizations use to track progress

IM Dropbox
User guides, data sets and other essentials information management tools

Spongebase
An interactive map tracking implementation across Lebanon

Assessment Registry

Factbook
Facts and figures about the Syrian refugee response
The **Data Portal** is where all sectors organize and publish their...

- Meeting minutes
- Maps
- Guidelines
- Strategies
- Dashboards
- Calenders of events/meetings
Also includes…

UNHCR refugee population maps

• Refugee population by district
UNHCR refugee population maps

- Refugee population by cadastral
“251 Most Vulnerable Cadastrals”, March 2015

Calculation of the Most Vulnerable Localities is based on the following datasets:

1 - Multi-Deprivation Index (MDI)

The MDI is a composite index, based on deprivation level scoring of households in five critical dimensions:

- Access to Health services;
- Income levels;
- Access to Education services;
- Access to Water and Sanitation services;
- Housing conditions.

MDI is from CAS, UNDP and MoSA Living Conditions and Household Budget Survey conducted in 2004.

2 - Lebanese population dataset

Lebanese population data is based on CDR 2002.

3 - Refugee population figures

The refugee population includes all registered Syrian refugees, PRL and PRS. Syrian refugee data is based on UNHCR registration database as of November 2014 and Palestine refugees data is based on 270,000 AUB/UNRWA figure (PRL as of 2011 and PRS 2014).
Lebanon Map Hub is the go-to place for dynamic maps related to the Syria Crisis Response in Lebanon; it hosts various thematic maps that highlight particular issues like economic vulnerabilities or out of schools children.

ActivityInfo is an open source tool for planning and reporting on aggregated activities for all sectors and agencies in the Lebanon operation. The tool facilitates coordination through the tracking of various agencies’ activities across the country as well as the identification of gaps.
Includes…

**ActivityInfo raw data exports**

- Raw ActivityInfo data is published monthly in an Excel spreadsheet in the IM Dropbox

< LCRP_2016_Reporting_AllData_yyyymmdd.xlsx

IM Dropbox ➔ “3. Data analysis & 3Ws” ➔ “ActivityInfo_DataExport” ➔ “LCRP_2016_Reporting_AllData_yyyymmdd”
Also includes…

**LCRP population package**

- Population of Lebanese, Syrians, Palestinians by district; age; gender
- Counts of schools, PHCs, SHCs, SDCs, informal settlements by district
- Updated yearly before every planning cycle

Assessment Registry

The Assessment Registry is an online repository of on-going and past assessments in Lebanon.

Assessment Registry Form

- Allows you to submit a new assessment to be added to the Assessment Registry.

List of all registered assessments

- Facilitates management and utilization of existing information.
- Decreases duplication of assessments across the response.
Factbook is a searchable repository of interesting facts and figures related to the response. For example, search for “poverty” and you get all facts related to that subject.

Spongebase is an online dynamic map that allows for the aggregation of LCRP partner reporting at different geographical levels:

1. It collects data from ActivityInfo, RAIS and the Informal Settlements Mapping exercise;
2. It allows for the download of data as an excel spreadsheet;
3. Geographical levels (municipality, cadasters) within Spongebase are created with boundaries, except for villages. You can click on a district or municipality to see reports in that location or and all reports for a specific partner or activity by typing in the search box (e.g. "weatherproofing" or “NRC”).
