2 Diseases & trends

Key Acute Health Conditions

- Upper Respiratory Tract Infection (URTI)
- Urinary tract infection
- Skin Infection
- Lower Respiratory Tract Infection (LRTI)
- Watery diarrhoea

During the month of July 2019, upper respiratory tract infection (URTI) was the highest reported acute health condition with a proportional morbidity of 26%. There was a slight increase in reported skin infection cases in comparison to previous months. No significant changes in the trends of other acute health conditions.

Key Chronic Health Conditions

- Hypertension
- Diabetes
- Asthma
- Cardiovascular disease
- Ischaemic heart disease

During the month of July 2019, hypertension, asthma and diabetes were the highest reported chronic health conditions with a proportional morbidity of 14%, 12% and 9% respectively. Trend in chronic health conditions varies as a result of clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate therapeutic outcomes which necessitates enhanced accessibility of those morbid diseases to the health care facility.
