Refugee Access to Livelihoods and Housing, Land, and Property

May 2019 **UGANDA**

Uganda is currently hosting the largest number of refugees in the region with over 1.2 million refugees and asylum seekers, primarily from South Sudan, the Democratic Republic of Congo (DRC), and Burundi.1 Recently arrived refugees have joined Rwandese, Somali, and other refugees that have lived in Uganda for decades. Due to the large number of refugees, the range of countries of origin, and the varying lengths of displacement, there are key information gaps on how access to or lack of housing, land, and property (HLP) for refugees impact their potential for sustainable livelihoods. In partnership with Norwegian Refugee Council (NRC), REACH conducted an assessment from 3 December 2018 to 15 March 2019 to collect baseline data on refugees' access to livelihoods and HLP. The assessment aims to provide a better understanding of the conditions of refugee access to livelihoods and HLP, the linkages, and other factors influencing sustainable livelihoods and potential movement within Uganda.

METHODOLOGY

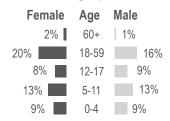

A mixed methods approach was used, driven by a household-level structured survey, semi-structured key informant interviews (KIIs) and focus group discussions (FGDs). The quantitative household-level survey produced results representative for the refugee population in 30 refugee settlements (considered as 25 due to five combined settlements in Adjumani) across 11 districts, as well as selected divisions of Kampala (Makindve. Kampala Central, and Kawempe) with a 95% confidence level and 10% margin of error at the settlement level for all questions asked to the entire sample size. A total of 3.165 households were interviewed for this assessment. All questions referring to a subset are footnoted.

KIIs and FGDs were used to triangulate the data and provide context to quantitative findings. KIIs targeted settlement leadership, including Office of the Prime Minister (OPM) commandants and UNHCR staff, refugee welfare committee leaders, district local government officials, and key partners working in relevant sectors. Semi-structured FGDs were stratified by gender and conducted with refugee and host community groups in each location.

Findings in this factsheet are representative of refugee households in Arua district. A total of 260 refugee households were interviewed in Arua.

- Somalia (2%)

BRIEF OVERVIEW OF ARUA DISTRICT

Arua district, in the West Nile region, hosts around 160,040 refugees in two refugee settlements, Imvepi and Rhino Camp. While Imvepi was established in 2017 to accommodate the influx from South Sudan, Rhino Camp was opened in 1980 during an earlier Sudanese civil war. Refugees, mainly from South Sudan, compose 16% of the district's population.

¹ Figures based on United Nations High Commissioner for Refugees (UNHCR) and Office of the Prime Minister (OPM) population figures updated as of April 2019.

³ Respondents could answer more than one option for this question.

²This question was only asked to the 13% of respondents facing HLP challenges. The level of confidence may thus be lower than 95%.

HOUSING

UGANDA

District: ARUA

TENURE ARRANGEMENTS

% of HHs by shelter tenure:

60% Owned by the head of the household

37% Owned jointly between household members

2% Owned by the spouse

1% Owned by other family members

3% of HHs have documentation proving ownership or legal occupancy of shelter.

% of HHs by methods of shelter acquisition:

Construct	90%
Acquire	10%

Of the 90% of HHs that reported constructing their shelter, most commonly reported ways of acquiring materials:³

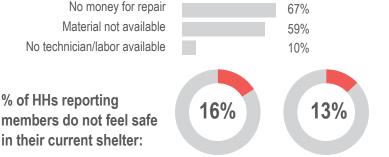

Nature		83%
Purchased		45%
Assistance		19%

SHELTER CHALLENGES

76% of HHs reported shelter damage. Of those, the most commonly reported parts of the shelter damaged are:³

Damage to roof	91%
Damage to wall material	14%
Damage to floor	9%

29% of HHs reported not being able to conduct repairs. Of those, the most commonly reported reasons include:³

Female

Male

IAND

ACCESS TO LAND

% of HH reporting:3

Method of accessing land around shelter plot:

12% of HHs reported accessing land outside their shelter. Of those, the most commonly reported methods of accessing that land are:³

OPM/UNHCR allocation	56%
Renting to access someone else's land	44%
Accessing someone else's land for free	18%

USE OF LAND FOR CULTIVATION

74% of HHs reported using their shelter plot for cultivation. Of those, the following reported on sufficiency of the land to provide food for the HH in the most recent harvest.²

FORMAL AGREEMENTS

Of the 1% that access land around shelter plot through renting, free access, or ownership, 0% of HHs have a formal agreement to access the land

Of the 62% of land accessed by refugees outside of their shelter plot through renting, free access, or ownership, 9% is accessed through formal agreement

⁴ The Government of Uganda allocates land for residential and agricultural purposes, to refugees, irrespective of ethnicity and origin. This is done via OPM with the support of UNHCR.

HLP Challenges

UGANDA

District: ARUA

13% of HHs reported facing HLP challenges. Of those:

Most commonly reported areas of HLP issues (% of HLP issues):³

Most commonly reported types of HLP issues (% of HLP issues):³

479	Plot given was unusable
229	Trespassing
159	Theft

HLP ISSUE RESOLUTION

11% of the 44 HLP issues reported were attempted to be resolved by the HHs.

Out of the HLP issues that HHs attempted to resolve, the following mechanisms were used:³

Help desk	59%
Refugee Welfare Committee	53%
Local council court	20%

9% of the HLP issues reported were resolved

PROPERTY

51% of HHs reported having no property at all. Out of the 49% who do:

HHs with income-generating property

26%
