Refugee Access to Livelihoods and Housing, Land, and Property

May 2019 UGANDA

CONTEXT

Uganda is currently hosting the largest number of refugees in the region with over 1.2 million refugees and asylum seekers, primarily from South Sudan, the Democratic Republic of Congo (DRC), and Burundi.¹ Recently arrived refugees have joined Rwandese, Somali, and other refugees that have lived in Uganda for decades. Due to the large number of refugees, the range of countries of origin, and the varying lengths of displacement, there are key information gaps on how access to or lack of housing, land, and property (HLP) for refugees impact their potential for sustainable livelihoods. In partnership with Norwegian Refugee Council (NRC), REACH conducted an assessment from 3 December 2018 to 15 March 2019 to collect baseline data on refugees' access to livelihoods and HLP. The assessment aims to provide a better understanding of the conditions of refugee access to livelihoods and HLP, the linkages, and other factors influencing sustainable livelihoods and potential movement within Uganda.

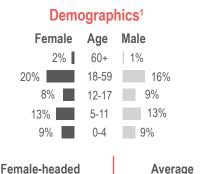

METHODOLOGY

A mixed methods approach was used, driven by a household-level structured survey, semi-structured key informant interviews (KIIs) and focus group discussions (FGDs). The quantitative household-level survey produced results representative for the refugee population in 30 refugee settlements (considered as 25 due to five combined settlements in Adjumani) across 11 districts, as well as select divisions of Kampala (Makindye, Kampala Central, and Kawempe) with a 95% confidence level and 10% margin of error at the settlement level for all questions asked to the entire sample size. A total of 3,165 households were interviewed for this assessment. All questions referring to a subset are footnoted.

KIIs and FGDs were used to triangulate the data and provide context to quantitative findings. KIIs targeted settlement leadership, including Office of the Prime Minister (OPM) commandants and UNHCR staff, refugee welfare committee leaders, district local government officials, and key partners working in relevant sectors. Semi-structured FGDs were stratified by gender and conducted with refugee and host community groups in each location.

Findings in this factsheet are representative of refugee households living in Boroli refugee settlement. A total of 147 refugee households were interviewed in Boroli.

REACH

BRIEF OVERVIEW OF BOROLI IN ADJUMANI DISTRICT

Boroli is located in Adjumani district and has a surface area of 103 hectares. Boroli I first opened on the 1st January 2014 and its extension, Boroli II, was established and opened in 2015. The vast majority of refugees residing at Boroli settlement are South Sudanese and fled insecurity in their country of origin. Boroli also hosts a minority of refugees from Ethiopia and Somalia.

HOUSING

SETTLEMENT: BOROLI

TENURE ARRANGEMENTS

% of HHs by shelter tenure:

- 91% Owned by the head of the household
- **5%** Owned jointly between household members
- 2% Owned by the spouse
- 1% Owned by other family members (rent free)1% Rented

0% of HHs have documentation proving ownership or legal occupancy of shelter.

% of HHs by methods of shelter acquisition:

Construct	96%
Acquire	4%

Of the 96% of HHs that reported constructing their shelter, most commonly reported ways of acquiring materials:³

Purchased	74%
Nature	71%
Assistance	11%

SHELTER CHALLENGES

81% of HHs reported shelter damage. Of those, the most commonly reported parts of the shelter damaged are:³

Damage to roof	
Damage to windows and/or doors	
Damage to wall material	

of	94%
s	15%
al	7%

52% of HHs reported not being able to conduct repairs. Of those, the most commonly reported reasons include:³

LAND

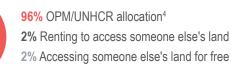

the most recent harvest.

ACCESS TO LAND

% of HH reporting:³

Accessing land where shelter is located	97%
Accessing land in a separate plot	18%
No access to any land	1%

Method of accessing land around shelter plot:

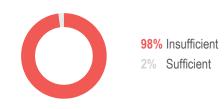

18% of HHs reported accessing land outside their shelter. Of those, the most commonly reported methods of accessing that land are:³

Renting to access someone else's land	73%
Accessing someone else's land for free	19%
OPM/UNHCR allocation	8%

 94% of HHs reported using their shelter plot for cultivation. Of those, the following reported on sufficiency of the land to provide food for the HH in

USE OF LAND FOR CULTIVATION

FORMAL AGREEMENTS

Of the 4% that access land around shelter plot through renting, free access, or ownership, 0% of HHs that have a formal agreement to access the land

> Informing more effective humanitarian action

Of the 92% of land accessed outside of shelter plot through renting, free access, or ownership, 17% are accessed through formal agreement

REAC

⁴ The Government of Uganda allocates land for residential and agricultural purposes, to refugees, irrespective of ethnicity and origin. This is done via OPM with the support of UNHCR.
