UNHCR has distributed kits to households to help re-strengthen their shelters, ahead of and during the monsoon season. Over 88,000 families receive kits to help them tie down their bamboo-frame shelters. 43,109 families were supported with shelter repair/replacement materials to replace degraded parts of their shelter’s structure.

**UNHCR shelter strategy aims to:**

1. Develop a **master site plan** for refugee settlements in collaboration with relevant sector.
2. Improve **shelter design** that meets the minimum standard for safe, dignified and appropriate living.
3. Improve the **living environment** in refugee settlements for better protection of refugees and access to services and facilities.

**PROGRESS**

Many of the settlement areas are prone to flooding and landslides due to their hilly locations in Cox’s Bazar. UNHCR collaborated with IOM and WFP through an engineering platform called the Site Management Engineering Project (SMEP) to develop land and infrastructure across all refugee settlements, including preparing flat land in the large Kutupalong refugee settlement. UNHCR and its partners designed and built stronger and better-built shelters in the newly prepared land for over 1,300 refugee households prioritised for urgent relocation before and during the monsoon season in mid-2018. Additionally, UNHCR and partner agencies continue to construct facilities and improved infrastructure in the settlements. The Government of Bangladesh has approved a mid-term shelter strategy (MTS strategy), as assistance in the refugee settlements is shifting to medium-term planning. As part of the MTS strategy, UNHCR is advocating for the construction of ‘transitional shelters’. UNHCR is also delivering on innovative shelter alternatives to address spatial constraints and congestion in the settlements. These shelters would need to be built with specific site planning, in which UNHCR is engaging the authorities. UNHCR and BRAC established new plants to treat bamboo which will be used for all future construction. Treated bamboo may last for 10-12 years by protecting it from fungi, insects and other biological and physical elements.

**CHALLENGE**

- Highly congested settlements and limited options for relocation to safer areas pose health and protection risks;
- Site management needs to be strengthened to ensure protection is fully integrated in its approach at all levels;
- The settlements and their infrastructure are extremely fragile and need more disaster-proofing, especially for cyclone preparedness.

**WAY FORWARD**

UNHCR’s Transitional Shelter incorporates disaster risk reduction elements in its basic design with a steel frame structure that can withstand high winds. It meets the minimum SPHERE standard for covered shelter space and therefore contributes to better safety, privacy, and dignity of life. UNHCR and others will continue to advocate for a sustainable mid-term shelter strategy, more land to decongest overcrowded settlements and relocate refugees from areas with natural hazards, as well as improve the areas already provided by the Government of Bangladesh. UNHCR and other actors are honing coordination and developing wider partnerships to improve shelters and living conditions.
88,361 Households received pre monsoon shelter kit in 2019
82,039 Shelter received support for repair/replacement in 2019
100,423 Household received fuel (LPG)
147,762 Female hygine kits were distributed in 2019
48 Compress rice husk (CRH) were resupplied in November
86,706 Padlocks were provided to the households

KEY FIGURES

82,039 Households received shelter repair and replacement assistance (Target:83,165)
2,026 Core Relief Item were distributed (Target: 30,000)
88,361 Pre Monsoon Kit distributed (Target:97,267)

ROHINGYA REFUGEE RESPONSE - BANGLADESH
DASHBOARD – SHELTER/SITE PLANNING/NFI
30 November 2019

THANK YOU

UNHCR’s humanitarian response in Bangladesh is made possible thanks to the generous support of major donors who have contributed unrestricted funding to UNHCR’s global operations, and to donors who have generously contributed directly to UNHCR Bangladesh operations.

In 2016 and 2019, support has been received from the people and governments of:

Australia, Bangladesh, Canada, Denmark, Estonia, the European Union, France, Germany, Ireland, Italy, Japan, the Republic of Korea, the Netherlands, New Zealand, Norway, Qatar, the Kingdom of Saudi Arabia, Spain, Sweden, Switzerland, Thailand, the United Arab Emirates, the United Kingdom, and the United States of America.

All Indicators are based on 2019 UNHCR operation plan. Source: UNHCR and UNHCR Partners. More information, contact bpcio@unhcr.org or visit http://data2.unhcr.org/en/situations/myanmar_refugees

Creation date: 30 November 2019
