22% of IDP households reported that they intended to return to their AoO within 12 months following data collection, compared to 13% within 3 months.

DISPLACEMENT DEMOGRAPHICS

MAP: DISTRICT OF ORIGIN WITHIN AL-ANBAR

Municipalities with a large number of IDP households:
- Fallujah: 69%
- Other: 31%

Government of Displacement:
- Al-Anbar: 73%
- Baghdad: 10%
- Nineawa: 5%
- Kirkuk: 5%
- Other: 7%

1 IOM, Displacement Tracking Matrix (July 2019)
2 IOM, Integrated Location Assessment IV and the RASP informal site assessment. Informal sites are defined as places not built to accommodate the displaced but that are serving that purpose, where authorities are not responsible for management and administration, and there are at least five households. In these sites, services and assistance may be available but are not provided regularly. National CCCM Cluster Reporting, as of July 2019.
3 Other include Anis, Haditha, Qain, Ramadi and Rutba districts.
4 With a minimum 90% confidence level and 10% margin of error in order not to be indicative. When findings are based on a small subset of the sample population they should be considered indicative rather than statistically generalizable. In these cases, findings will be reported as number of households, and not percentages.
5 Other include Al-Sulaymaniyyah, Salah al-Din, Erbil, Diyala and Wasit governates.
MOVEMENT INTENTIONS BY DISTRICT OF ORIGIN

REASONS NOT TO RETURN TO AREA OF ORIGIN

Top four reported reasons for not intending to return (among IDP households not intending to return):†

- Fear and trauma associated with AoO
- Home has been damaged/destroyed
- Perceived lack of security forces in AoO
- No financial means to return

NEEDS TO RETURN TO AREA OF ORIGIN

Top four factors that IDP households reported could enable return to their AoO:†

- Safety and security in AoO increasing
- Information on the conditions in AoO
- Availability of basic services in AoO
- Rehabilitation / Reconstruction of homes in AoO

PERCEPTIONS OF SHELTER CONDITIONS IN AREA OF ORIGIN

Reported level of damage to shelter in AoO:

- Completely destroyed/heavily damaged: 87%
- Partially damaged: 12%
- Undamaged: 0%
- Do not know: 1%

Proportion of IDP households reporting that their shelter was completely destroyed or heavily damaged, originating from Fallujah:

- Fallujah: 90%

Fear and trauma associated with the AoO was the most commonly reported reason not to return by IDP households (51%), indicating the potential need for psychosocial support to enable a safe return. The second most reported reason not to return to the AoO was associated with shelter being completely destroyed or damaged (45%), which echoes the high proportion of IDP households reporting their shelter to be completely destroyed or heavily damaged (87%). While rehabilitation of shelter is the fourth most reported need to return (30%), other common reported needs to return were to improve safety and security in the AoO (78%), improve access to information (63%) and to improve the availability of basic services (50%). These findings highlight the need to provide psychosocial support, livelihood intervention and improve access to information on conditions in AoO, to enable a safe and durable return for IDP households originating from Al-Anbar.

† Respondents could provide multiple reasons. Therefore, results may exceed 100%.
PERCEPTIONS OF SAFETY CONDITIONS IN AOO BY DISTRICT OF ORIGIN

Proportion of IDP households that reported to have concerns about safety in their AoO:

<table>
<thead>
<tr>
<th>Have no or little concerns</th>
<th>Have concerns about safety</th>
<th>Do not know</th>
<th>Decline to answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fallujah</td>
<td>16%</td>
<td>50%</td>
<td>34%</td>
</tr>
<tr>
<td>Governorate level</td>
<td>16%</td>
<td>58%</td>
<td>26%</td>
</tr>
</tbody>
</table>

Top three reported reasons for having safety concerns (among IDP households with concerns):

- Gender based violence
- Armed security actors
- Close to conflict

Gender based violence was the most commonly safety concern reported by IDP households at governorate level (40%). Other main safety concerns reported at governorate level and in Fallujah district were directly linked to conflict: perceived presence of armed security actors (36%) and AoO being close to conflict (27%).

PERCEPTIONS OF SERVICES AND ASSISTANCE IN AOO BY DISTRICT OF ORIGIN:

**Perceived availability of basic services in AoO:**

<table>
<thead>
<tr>
<th>Fallujah</th>
<th>Governorate level</th>
</tr>
</thead>
<tbody>
<tr>
<td>52%</td>
<td>41%</td>
</tr>
<tr>
<td>32%</td>
<td>45%</td>
</tr>
<tr>
<td>16%</td>
<td>14%</td>
</tr>
</tbody>
</table>

At the governorate level, 45% of IDP households perceived that basic services were available in their AoO. In Fallujah, basic services were perceived less available according to IDP households (32%).

Among IDP households perceiving an availability of basic services in their AoO, the most frequently reported services were: water (98%), electricity (95%) and waste disposal (66%). As mentioned above, 44% of IDP households reported that availability of basic services could enable their return.

**Perceived availability of livelihood opportunities in AoO:**

<table>
<thead>
<tr>
<th>Fallujah</th>
<th>Governorate level</th>
</tr>
</thead>
<tbody>
<tr>
<td>39%</td>
<td>44%</td>
</tr>
<tr>
<td>61%</td>
<td>56%</td>
</tr>
</tbody>
</table>

At the governorate level, 56% of IDP households perceived that livelihood opportunities were available in their AoO at the time of data collection. This was slightly higher in Fallujah (61%).

Among them, the most frequently reported employment sectors, were: agriculture (82%), government (32%) and construction (31%).

**Perceived availability of assistance in AoO:**

<table>
<thead>
<tr>
<th>Fallujah</th>
<th>Government level</th>
</tr>
</thead>
<tbody>
<tr>
<td>59%</td>
<td>55%</td>
</tr>
<tr>
<td>20%</td>
<td>25%</td>
</tr>
<tr>
<td>21%</td>
<td>20%</td>
</tr>
</tbody>
</table>

At the governorate level, 55% of IDP households perceived that assistance was provided in their AoO. Trends across districts of origin were similar.

Among them, the most frequently reported types were: food assistance (93%), cash distribution (83%) and NFI distribution (58%). Assistance was mainly reported to have been provided by humanitarian actors.

---

1 Respondents could select multiple options. Therefore, results may exceed 100%.
October 2019

Between 2013 and 2017, intensification of conflict in north and central Iraq resulted in large scale displacement. Since mid-2018 and throughout 2019, Internally Displaced Person (IDP) rates of return to their Area of Origin (AoO) across Iraq slowed down, with 1.6 million IDPs remaining in displacement as of July 2019. Of these, approximately 59,000 IDPs are estimated to be residing in informal sites, and a further 353,000 in 93 formal camps across the country at the time of data collection. This trend has highlighted the need for greater information on movement intentions to better understand barriers to returning, requisite conditions for safe and voluntary return, as well as the extent to which intentions vary based on where IDPs are from. To address this information gap, REACH, in partnership with the Iraq Camp Coordination and Camp Management (CCCM) Cluster, conducted intentions surveys of IDP households living in formal camps and informal sites. These took place between 17 June and 20 August for in-camp locations, and between 4 September and 12 October for informal sites, concurrent with other REACH assessments (Camp Profiling XII and RASP VIII).

A total of 3,210 IDP households were assessed across 49 formal camps and 2,114 IDP households across 38 informal sites in Al-Anbar, Baghdad, Duhok, Diyala, Erbil, Kerbala, Kirkuk, Nineawa, Salah al-Din, Al-Sulaymaniyah and Wasit governorates. Households were randomly sampled to allow findings to be generalizable with a 90% level of confidence and 10% margin of error at the camp and informal site level.

This factsheet presents findings for all IDP households in formal camps and informal sites that reported originating from Babil governorate. A total of 388 IDP households reporting to originate from Babil governorate were interviewed. None of those households was still located in Babil governorate during the time of data collection. At the governorate of origin and district of origin levels, findings are generalizable with a minimum 90% level of confidence and maximum 10% margin of error. This level is guaranteed for all questions that apply to the entire surveyed population. Findings relating to a subset of the population may have a lower confidence level, wider margin of error, or may be indicative only. Full details on the methodology are included in the Terms of Reference.

A low proportion of IDP households reported that they intended to return to their AoO within the 12 months following data collection (9%), and within 3 months (4%).
The main reasons indicated by IDP households for not returning to their AoO were mainly linked to the conflict: fear and trauma associated with AoO (70%), perceived presence of mines in AoO (33%), and a perceived lack of security forces in AoO (29%). While security concerns were the main reasons not to return, the needs reported in order to enable IDP households to return were linked to the conditions in their AoO. IDP households cited the need to get information on the conditions in their AoO (76%), to increase safety and security conditions (45%) as well as improving the availability of basic services (40%). This highlights the need to inform conditions of return in Babil governorate, to improve the access to basic services and livelihood opportunities and about security and safety conditions in their AoO, as almost half of IDP households consistently reported not knowing the conditions in their AoO in terms of security, basic services and assistance provided.

**October 2019**

**INTENTIONS SURVEY**

**CONTEXT AND METHODS**

Between 2013 and 2017, intensification of conflict in north and central Iraq resulted in large scale displacement. Since mid-2018 and throughout 2019, Internally Displaced Person (IDP) rates of return to their Area of Origin (AoO) across Iraq slowed down, with 1.6 million IDPs remaining in displacement as of July 2019.1 Of these, approximately 59,000 IDPs are estimated to be residing in informal sites, and a further 353,000 in 93 formal camps across the country at the time of data collection.2

This trend has highlighted the need for greater information on movement intentions to better understand barriers to returning, requisite conditions for safe and voluntary return, as well as the extent to which intentions vary based on where IDPs are from. To address this information gap, REACH, in partnership with the Iraq Camp Coordination and Camp Management (CCCM) Cluster, conducted intentions surveys of IDP households living in formal camps and informal sites. These took place between 17 June and 20 August for in-camp locations, and between 4 September and 12 October for informal sites, concurrent with other REACH assessments (Camp Profiling XII and RASP VIII).

A total of 3,210 IDP households were assessed across 49 formal camps and 2,114 IDP households across 38 informal sites in Al-Anbar, Baghdad, Dahuk, Diyal, Erbil, Kerbal, Kirkuk, Ninewa, Salai al-Din, Al-Sulaymaniya, and Wasit governorates. Households were randomly sampled to allow findings to be generalizable with a 90% level of confidence and 10% margin of error at the camp and informal site level.

This factsheet presents findings for all IDP households in formal camps and informal sites that reported originating from Diyal governorate. A total of 214 IDP households reporting to originate from Diyal governorate were interviewed. Of those households, 181 were located in Diyal governorate during the time of data collection. At the governorate of origin and district of origin levels, findings are generalizable with a minimum 90% level of confidence and maximum 10% margin of error. This level is guaranteed for all questions that apply to the entire surveyed population. Findings relating to a subset of the population may have a lower confidence level, wider margin of error, or may be indicative only.4

Full details on the methodology are included in the Terms of Reference.

REASONS NOT TO RETURN TO AREA OF ORIGIN

Top four reported reasons for not intending to return (among IDP households) not intending to return: 7

- Home has been damaged/destroyed
- No financial means to return
- Perceived lack of livelihood/income generating activities
- Fear of discrimination in AoO

NEEDS TO RETURN TO AREA OF ORIGIN

Top four factors that IDP households reported could enable return to their AoO: 7

- Rehabilitation / Reconstruction of homes in AoO
- Safety and security in AoO increasing
- Furniture and non-food items
- Livelihood opportunities in AoO

PERCEPTIONS OF SHELTER CONDITIONS IN AREA OF ORIGIN

Reported level of damage to shelter in AoO:

- 82% Completely destroyed/heavily damaged
- 13% Partially damaged
- 1% Undamaged
- 4% Do not know

Proportion of IDP households reporting that their shelter was completely destroyed or heavily damaged, originating from Muqadiya:

- Muqadiya: 86%

Shelter and livelihood conditions in AoO were frequently indicated as a main influence on intentions to return for IDP households from Diyala. A high proportion of IDP households cited rehabilitation and reconstruction of their home in AoO as a main need to enable return (65%) and almost half indicated their house being damaged or destroyed as a reason not to return (46%). This echoes the high proportion of IDP households indicating that their home was completely destroyed or heavily damaged (82%). Furniture and Non-Food Items (NFI) were also commonly indicated by IDP households as a need to enable their return, which indicated the need to focus interventions on shelter rehabilitation and NFI distributions. The lack of financial means to return to their AoO, combined with the perceived lack of livelihood opportunities, were also frequently cited as reasons for not intending to return (46% and 35% respectively). In addition, almost a third (27%) reported livelihood opportunities in AoO as a need to enable return. These findings also underline the priority for livelihood interventions in Diyala.

7 Respondents could provide multiple reasons. Therefore, results may exceed 100%.
PERCEPTIONS OF SAFETY CONDITIONS IN AOO BY DISTRICT OF ORIGIN

Proportion of IDP households that reported to have concerns about safety in their AoO:

<table>
<thead>
<tr>
<th></th>

<td>0%</td>
</tr>
<tr>
<td>Governorate level</td>
<td>29%</td>
<td>56%</td>
<td>15%</td>
<td>0%</td>
</tr>
</tbody>
</table>

Top three reported reasons for having safety concerns (among IDP households with concerns):

- Armed security actors
- Sporadic clashes
- Extremist groups

More than half of IDP households (56%) originating from Diyala reported having concerns about safety in their AoO. Of the IDP households reporting safety concerns, security-related issues were the main indicated reasons. They included the perceived presence of armed security actors (38%), sporadic clashes (33%) and the perceived presence of extremist groups (29%).

PERCEPTIONS OF SERVICES AND ASSISTANCE IN AOO BY DISTRICT OF ORIGIN:

**Perceived availability of basic services in AoO:**

<table>
<thead>
<tr>

At the governorate level, 38% of IDP households perceived that assistance was provided in their AoO. Trends across districts of origin were similar.

- Food assistance (99%)
- Cash distribution (31%)
- NFI distribution (10%)

Assistance was mainly reported to have been provided by humanitarian actors.

*Respondents could select multiple options. Therefore, results may exceed 100%.*
**CONTEXT AND METHODS**

Between 2013 and 2017, intensification of conflict in north and central Iraq resulted in large scale displacement. Since mid-2018 and throughout 2019, Internally Displaced Person (IDP) rates of return to their Area of Origin (AoO) across Iraq slowed down, with 1.6 million IDPs remaining in displacement as of July 2019. Of these, approximately 59,000 IDPs are estimated to be residing in informal sites, and a further 353,000 in 93 formal camps across the country at the time of data collection. This trend has highlighted the need for greater information on movement intentions to better understand barriers to returning, requisite conditions for safe and voluntary return, as well as the extent to which intentions vary based on where IDPs are from. To address this information gap, REACH, in partnership with the Iraq Camp Coordination and Camp Management (CCCM) Cluster, conducted intentions surveys of IDP households living in formal camps and informal sites. These took place between 17 June and 20 August for in-camp locations, and between 4 September and 12 October for informal sites, concurrent with other REACH assessments (Camp Profiling XII, and RASP VIII).

A total of 3,210 IDP households were assessed across 49 formal camps and 2,114 IDP households across 38 informal sites in Al-Anbar, Baghdad, Dahuk, Diyala, Erbil, Kerbala, Kirkuk, Ninewa, Salah al-Din, Al-Sulaymaniya and Wasit governorates. Households were randomly sampled to allow findings to be generalizable with a 90% level of confidence and 10% margin of error at the camp and informal site level.

This factsheet presents findings for all IDP households in formal camps and informal sites that reported originating from Kirkuk governorate. A total of 560 IDP households reporting to originate from Kirkuk governorate were interviewed. Of those households, 392 were located in Kirkuk governorate during the time of data collection. At the governorate of origin and district of origin levels, findings are generalizable with a minimum 90% level of confidence and maximum 10% margin of error. This level is guaranteed for all questions that apply to the entire surveyed population. Findings relating to a subset of the population may have a lower confidence level, wider margin of error, or may be indicative only.

Full details on the methodology are included in the Terms of Reference.

REASONS TO RETURN TO AREA OF ORIGIN

Top four reported reasons for intending to return (among IDP households that intend to return):*4

- Security situation in AoO perceived as stable: 93%
- Perceived availability of basic services in AoO: 45%
- Emotional desire to return: 45%
- Other members have returned: 27%

Across all governorates, a majority of IDP households reported the perceived stabilization of security in their AoO as a reason to return to their AoO, ranging from 90% in Hawiga, to 100% in Daquq and Dibis.

REASONS NOT TO RETURN TO AREA OF ORIGIN

Top four reported reasons for not intending to return (among IDP households that did not intend to return):*6

- Perceived lack of livelihood/income generating activities: 53%
- Home has been damaged/destroyed: 48%
- No financial means to return: 40%
- Fear and trauma associated with AoO: 19%

NEEDS TO RETURN TO AREA OF ORIGIN

Top four issues that IDP households reported could enable return to AoO:*6

- Rehabilitation / Reconstruction of homes in AoO: 60%
- Safety and security in AoO increasing: 77%
- Livelihood opportunities in AoO: 53%
- Availability of basic services in AoO: 56%

PERCEPTIONS OF SHELTER CONDITIONS IN AREA OF ORIGIN

</tbody>
</table>

Top three reported reasons for having safety concerns (among IDP households from each district with concerns):

- Explosive hazards
- Close to conflict
- Armed security actors

At the governorate level, a third of IDP households reported having safety concerns that were directly linked to conflict, including perceived presence of explosive hazards (34%), being close to conflict (33%), as well as the perceived presence of armed security actors (33%). The perceived presence of explosive hazards was predominantly reported in Daquq (55%) and Dibis (49%), while perceived presence of armed security actors was the most commonly reported security concern in Hawiga.

PERCEPTIONS OF SERVICES AND ASSISTANCE IN AOO BY DISTRICT OF ORIGIN:

Perceived availability of basic services in AoO:

- Daquq
- 25% None available, 62% Some available, 13% Do not know
- Dibis
- 28% None available, 67% Some available, 5% Do not know
- Hawiga
- 9% None available, 74% Some available, 17% Do not know
- Governorate level
- 16% None available, 70% Some available, 14% Do not know

At the governorate level, 70% of IDP households perceived that basic services were available in their AoO, with results slightly varying between districts, from 62% in Daquq to 74% in Hawiga.

Among them, the most frequently reported available services were: electricity (96%), water (91%) and healthcare (47%).

Perceived availability of livelihood opportunities in AoO:

- Daquq
- 24% None available, 76% Some available, 0% Do not know
- Dibis
- 19% None available, 81% Some available, 0% Do not know
- Hawiga
- 36% None available, 64% Some available, 0% Do not know
- Governorate level
- 32% None available, 68% Some available, 0% Do not know

At the governorate level, 68% of IDP households perceived that livelihood opportunities were available in their AoO at the time of data collection. However, this was slightly higher in Dibis (81%), followed by Daquq (76%) and Hawiga (64%).

Among them, the most frequently reported available employment sectors were: agriculture (69%), government (37%) and construction (17%).

Perceived availability of assistance in AoO:

- Daquq
- 36% None available, 43% Some available, 21% Do not know
- Dibis
- 32% None available, 54% Some available, 12% Do not know
- Hawiga
- 32% None available, 42% Some available, 26% Do not know
- Governorate level
- 33% None available, 44% Some available, 23% Do not know

At the governorate level, 44% of IDP households perceived that assistance was provided in their AoO. Results were consistent by districts of origin, varying from 42% (Hawiga) to 54% (Dibis).

The most frequently reported types were: food assistance (93%), cash distribution (54%) and NFI distribution (26%). Assistance was mainly reported to have been provided by humanitarian actors.

*Respondents could select multiple options. Therefore, results may exceed 100%.
INTENTIONS SURVEY

IDP AREAS OF ORIGIN
NINEWA GOVERNORATE

CONTEXT AND METHODS

Between 2013 and 2017, intensification of conflict in north and central Iraq resulted in large scale displacement. Since mid-2018 and throughout 2019, Internally Displaced Person (IDP) rates of return to their Area of Origin (AoO) across Iraq slowed down, with 1.6 million IDPs remaining in displacement as of July 2019. Of these, approximately 59,000 IDPs are estimated to be residing in informal sites, and a further 353,000 in 93 formal camps across the country at the time of data collection. This trend has highlighted the need for greater information on movement intentions to better understand barriers to returning, requisite conditions for safe and voluntary return, as well as the extent to which intentions vary based on where IDPs are from. To address this information gap, REACH, in partnership with the Iraq Camp Coordination and Camp Management (CCCM) Cluster, conducted intentions surveys of IDP households living in formal camps and informal sites. These took place between 17 June and 20 August for in-camp locations, and between 4 September and 12 October for informal sites, concurrent with other REACH assessments (Camp Profiling XII, and RASP VIII).

A total of 3,210 IDP households were assessed across 49 formal camps and 2,114 IDP households across 38 informal sites in Al-Anbar, Baghdad, Dahuk, Diyala, Erbil, Kerbala, Kirkuk, Ninewa, Salah al-Din, Al-Sulaymaniya, and Wasit governorates. Households were randomly sampled to allow findings to be generalizable with a 90% level of confidence and 10% margin of error at the camp and informal site level. This factsheet presents findings for all IDP households in formal camps and informal sites that reported originating from Ninewa governorate. A total of 3,339 IDP households reporting to originate from Ninewa governorate were interviewed. Of those households, 1,207 were located in Ninewa governorate during the time of data collection. At the governorate of origin and district of origin levels, findings are generalizable with a minimum 90% level of confidence and maximum 10% margin of error. This level is guaranteed for all questions that apply to the entire surveyed population. Findings relating to a subset of the population may have a lower confidence level, wider margin of error, or may be indicative only.

Full details on the methodology are included in the Terms of Reference.

MOVEMENT INTENTIONS DURING THE 12 MONTHS FOLLOWING DATA COLLECTION

A low proportion of IDP households reported an intention to return: 2% of IDP households within 3 months following data collection, and 3% within 12 months.

66% Remain in current location
3% Return to AoO
0% Move to another location

Reported intentions to return during the 12 months following data collection were low in all districts and at governorate level, with 5% or less of IDP households reporting that they intended to return. The districts with lowest proportion of IDP households intending to return originated from Ba’aj and Sinjar (1%).

**REASONS TO RETURN TO AREA OF ORIGIN**

Top four reported reasons for intending to return (among IDP households intending to return):

- Security situation in AoO perceived as stable: 73%
- Perceived availability of basic services in AoO: 32%
- Emotional desire to return: 22%
- Limited livelihood opportunities in the area of displacement: 22%

Almost three quarters of IDP households reported a perceived stabilization of the security situation in their AoO as the primary reason driving their intention to return (73%). Other main reasons indicated were perceived availability of basic services (32%), emotional desire to return (22%) and limited livelihood opportunities in the area of displacement.

**REASONS NOT TO RETURN TO AREA OF ORIGIN**

Top four reported reasons for not intending to return (among IDP households not intending to return):

- Home has been damaged/destroyed: 39%
- Perceived lack of livelihood/income generating activities: 45%
- Perceived lack of security forces in AoO: 46%
- No financial means to return: 23%

The main reason reported by IDP households for not intending to return to their AoO was damage or destruction of their home. This was particularly the case for Shikhan, where it was reported by more than half of IDP households originating from the district (54%).

Other main reasons indicated for not intending to return to the AoO were related to lack of livelihood opportunities and lack of financial means to return, highlighting the need to prioritise livelihood interventions in Ninewa.

---

*Respondents could provide multiple reasons. Therefore, results may exceed 100%.*
NEEDS TO RETURN TO AREA OF ORIGIN

Top four factors that households reported could enable return to their AoO:

- Increased safety and security in AoO
- Availability of basic services
- Rehabilitation/reconstruction of homes
- Information on the current situation in AoO

A significantly higher proportion of IDP households from Ba‘aj, Shikhan and Sinjar reported the need to increase safety and security in their AoO to return (more than 80% of households). The need for rehabilitation/reconstruction of homes and availability of basic services were consistently reported as primary needs in all districts of origin.

PERCEPTIONS OF SAFETY CONDITIONS IN AOO BY DISTRICT OF ORIGIN

IDP households that reported having concerns about safety in their AoO:

<table>

</tbody>
</table>

Top three reported reasons for having safety concerns (among IDP households with concerns):

- Perceived presence of armed security actors
- Close to conflict
- Perceived presence of extremist groups

The proportion of IDP households that reported having concerns about safety in their AoO varied across districts: ranging from 24% (Telafar) to 82% (Ba‘aj). The most commonly reported concerns about safety were: perceived presence of armed security actors (31%), proximity to conflict (29%) and perceived presence of extremist groups (29%). A relatively high proportion of IDP households reported proximity to conflict as being a primary reason for having concerns in Hatra (71%), and the perceived presence of extremist groups in Hamdaniyah (56%).

*Respondents could select multiple options. Therefore, results may exceed 100%.
**PERCEPTIONS OF SHELTER CONDITIONS IN AREA OF ORIGIN**

Reported level of damage to shelter in AoO:

- 81% Completely destroyed/heavily damaged
- 13% Partially damaged
- 3% Undamaged
- 3% Do not know/decline to answer

Proportion of IDP households reporting their shelter to be completely destroyed or heavily damaged, by district of origin:

- Hamdaniyah: 87%
- Ba’aj: 86%
- Sinjar: 86%
- Shikhan: 85%
- Telafar: 83%
- Hatra: 81%
- Mosul: 80%

**PERCEPTIONS ON SERVICES AND ASSISTANCE IN AOO BY DISTRICT OF ORIGIN**

Perceived availability of basic services in AoO:

- Mosul: 22% (None available), 56% (Some available), 22% (Do not know)
- Hatra: 36% (None available), 34% (Some available), 30% (Do not know)
- Hamdaniyah: 39% (None available), 42% (Some available), 19% (Do not know)
- Ba’aj: 72% (None available), 14% (Some available), 14% (Do not know)

Perceived availability of livelihood opportunities in AoO:

- Mosul: 62% (None available), 37% (Some available), 1% (Do not know)
- Hatra: 59% (None available), 41% (Some available), 0% (Do not know)
- Hamdaniyah: 58% (None available), 42% (Some available), 0% (Do not know)
- Ba’aj: 84% (None available), 16% (Some available), 0% (Do not know)

At the governorate level, 36% of IDP households perceived that basic services were available in their AoO. This varied considerably by district, ranging from 14% in Ba’aj to 58% in Telafar. Among them, the most frequently reported services were: electricity (97%), water (84%) and education (60%).

At the governorate level, 32% of IDP households perceived that livelihood opportunities were available in their AoO at the time of data collection. This varied between districts, ranging from 16% in Ba’aj to 60% in Shikhan. Among them, the most frequently reported employment sectors were: agriculture (68%), government (41%) and

Perceived availability of assistance in AoO:

- Ba’aj: 67% (None available), 6% (Some available), 27% (Do not know)
- Hamdaniyah: 42% (None available), 19% (Some available), 39% (Do not know)
- Hatra: 52% (None available), 9% (Some available), 39% (Do not know)
- Mosul: 45% (None available), 18% (Some available), 37% (Do not know)
- Shikhan: 50% (None available), 28% (Some available), 22% (Do not know)
- Sinjar: 56% (None available), 13% (Some available), 31% (Do not know)
- Telafar: 46% (None available), 23% (Some available), 31% (Do not know)

At the governorate level, 14% of IDP households perceived that assistance was provided in their AoO. This varied considerably by districts, ranging from 6% in Ba’aj to 28% in Shikhan. Among them, the most frequently reported types of assistance were: food assistance (90%), NFI distribution (35%) and cash distribution (34%). Assistance was mainly reported to have been provided by humanitarian actors.

*Respondents could select multiple options. Therefore, results may exceed 100%.

Supporting Displaced Communities
INTENTIONS SURVEY

CONTEXT AND METHODS

Between 2013 and 2017, intensification of conflict in north and central Iraq resulted in large scale displacement. Since mid-2018 and throughout 2019, Internally Displaced Person (IDP) rates of return to their Area of Origin (AoO) across Iraq slowed down, with 1.6 million IDPs remaining in displacement as of July 2019.1 Of these, approximately 59,000 IDPs are estimated to be residing in informal sites, and a further 353,000 in 93 formal camps across the country at the time of data collection.2

This trend has highlighted the need for greater information on movement intentions to better understand barriers to returning, requisite conditions for safe and voluntary return, as well as the extent to which intentions vary based on where IDPs are from. To address this information gap, REACH, in partnership with the Iraq Camp Coordination and Camp Management (CCCM) Cluster, conducted intentions surveys of IDP households living in formal camps and informal sites. These took place between 17 June and 20 August for in-camp locations, and between 4 September and 12 October for informal sites, concurrent with other REACH assessments (Camp Profiling XII, and RASP VIII).3

A total of 3,210 IDP households were assessed across 49 formal camps and 2,114 IDP households across 38 informal sites in Al-Anbar, Baghdad, Duhok, Diyala, Erbil, Kerbala, Kirkuk, Nineva, Salah al-Din, Al-Sulaymaniyyah and Wasit governorates. Households were randomly sampled to allow findings to be generalizable with a 90% level of confidence and 10% margin of error at the camp and informal site level.

This factsheet presents findings for all IDP households in formal camps and informal sites that reported originating from Salah Al-Din governorate. A total of 455 IDP households reporting to originate from Salah Al-Din governorate were interviewed. Of those households, 128 were located in Salah Al-Din governorate during the time of data collection. At the governorate of origin and district of origin levels, findings are generalizable with a minimum 90% level of confidence and maximum 10% margin of error. This level is guaranteed for all questions that apply to the entire surveyed population. Findings relating to a subset of the population may have a lower confidence level, wider margin of error, or may be indicative only.4

Full details on the methodology are included in the Terms of Reference.

MOVEMENT INTENTIONS DURING THE 12 MONTHS FOLLOWING DATA COLLECTION

Overall, almost a third of IDP households reported not knowing whether they intend to return in the 12 months following data collection (36%). Only 3% of IDP households reported that they intended to return to their AoO within 12 months following data collection, and 2% within 3 months.

REASONS TO RETURN TO AREA OF ORIGIN

Top four reported reasons for intending to return (among IDP households that intend to return):^6

- Security situation in AoO perceived as stable: 68%
- Perceived availability of basic services in AoO: 25%
- Emotional desire to return: 24%
- Other members have returned: 23%

Among the 3% of IDP households reporting an intention to return to their AoO, a perceived stabilization of the security situation in the AoO was the most commonly reported reason (68%). Family ties were also a common reason to return, with 24% of IDP households reporting an emotional desire to return and 23% that other members have returned.

REASONS NOT TO RETURN TO AREA OF ORIGIN

Top four reported reasons for not intending to return (among IDP households that did not intend to return):^6

- Fear and trauma associated with AoO: 34%
- Perceived lack of security forces in AoO: 42%
- Perceived lack of livelihood/income generating activities: 51%
- No financial means to return: 18%

NEEDS TO RETURN TO AREA OF ORIGIN

Top four issues that households reported could enable return to AoO, by IDP population:^6

- Safety and security in AoO increasing: 46%
- Availability of basic services in AoO: 45%
- Rehabilitation/reconstruction of homes: 36%
- Information on the conditions in AoO: 33%

PERCEPTIONS OF SHELTER CONDITIONS IN AREA OF ORIGIN

Reported level of damage to shelter in AoO:

- 85% Completely destroyed/heavily damaged
- 13% Partially damaged
- 2% Undamaged
- 0% Do not know/refuse to answer

Proportion of households reporting their shelter to be completely destroyed or heavily damaged:

- Baiji: 88%
- Balad: 85%
- Shirqat: 78%
PERCEPTIONS OF SAFETY CONDITIONS IN AOO BY DISTRICT OF ORIGIN

Proportion of IDP households that reported to have concerns about safety in their AoO:

<table>
<thead>
<tr>
<th>District</th>

</tr>
</tbody>
</table>

Top three reported reasons for having safety concerns (among IDP households from each district with concerns): 6

- Close to conflict
- Sporadic clashes
- Armed security actors

Concerns about safety were overall high, with half of IDP households reporting having concerns about safety in their AoO (55%). At district level, concerns about safety were particularly high in Balad (75%), comparatively to other districts where the proportion was lower, 34% in Baiji and 22% in Shirqat.

Security was reported as the top reason for perceived lack of safety in all districts, especially in Shirqat where half of IDP households (52%) reported sporadic clashes.

PERCEPTIONS OF SERVICES AND ASSISTANCE IN AOO BY DISTRICT OF ORIGIN:

Perceived availability of basic services in AoO:

At the governorate level, 37% of IDP households perceived that basic services were available in their AoO. Although this varied considerably by district, ranging from 29% (Balad) to 65% (Shirqat).

Among them, the most frequently reported available services were: water (89%), electricity (84%) and healthcare (78%).

Perceived availability of livelihood opportunities in AoO:

At the governorate level, 39% of IDP households perceived that livelihood opportunities were available in their AoO at the time of data collection. However, this was comparatively higher in Shirqat (51%) and Balad (44%), than Baiji (18%).

Among them, the most frequently reported available employment sectors were: agriculture (89%), healthcare (24%) and government (23%).

Perceived availability of assistance in AoO:

At the governorate level, 18% of IDP households perceived that assistance was provided in their AoO. This varied by district: from 11% (Balad) to 31% (Shirqat).

The most frequently reported types were: food assistance (89%), NFI distribution (38%) and cash distribution (16%). Assistance was mainly reported to have been provided by humanitarian actors.
