Reporting Mechanism

At the start of the year, sectors set objectives, outputs and activity indicators and decide how to measure progress towards those goals.

What is an indicator?
Variable that indicates or shows a given situation, and hence can be used to measure change

Example:

Objective: Improved livelihoods and living conditions, including better and improved decent work conditions both for Syrians and host communities

Output: Syrian and/or impacted host communities gained better access to economic opportunities and gender sensitive active labour market

Indicator: # of Syrian men and women or host community members employed through public infrastructure and environmental assets improvement such as cash for work programmes
