Insufficient bed and human resource capacity of the health system to respond to an expected increase in COVID-19 cases.

Global shortages in supply of Personal Protective Equipment.

There are significant gaps in knowledge on maternal health and reproductive health combined with traditional practices result in poor health service utilization.

Poor infant and young child feeding and maternal care practices among children under 2 year.

Community-based psychosocial interventions are not yet at the scale needed to reach the number of refugees in need of these activities.

UNHCR will support the district hospital in the set up of a 10-bedded Intensive Care Unit and establish a 150 bedded isolation and treatment centre in Ukha.

UNHCR continue to improve sexual, and reproductive health programs and strengthen access to services for refugees with specific needs; improve the quality of health services and promote the use of health facilities; and scale up detection and treatment of non-communicable diseases.

UNHCR and partners will continue the treatment of acute malnutrition and scaling up of the community based IYCF activities adjusted in line with the action plan of the most recent assessments 2019 SMART survey and the Nutrition causal analysis assessment(NGA)

UNHCR is working to strengthen different levels of mental health and psychosocial support interventions, including training Community Psychosocial Volunteers (CPVs) and Community Para-Counsellors to promote community-based activities.
**HEALTH AND NUTRITION PROGRAMMES AND FACILITIES**

- **33** Health / MHPSS facilities
  - 9 MHPSS centers
  - 4 Specialised health facilities
  - 11 Health posts

- **21** Nutrition facilities
  - 3 Inpatient stabilisation centres
  - 18 Integrated centres including OTP, TSFP, BSFP, IYCF

**PROGRESS AGAINST 2020 TARGETS**

- **# of health facilities equipped/constructed/rehabilitated**
- **# of patients referred to secondary and tertiary medical care**
- **# of health facilities providing MHPSS services**
- **# of new admissions to community management of acute malnutrition programmes**

**HEALTH INDICATORS TRENDS**

- **Oct-19**
