### 2 Diseases & trends

#### Key Acute Health Conditions

- Upper Respiratory Tract Infection (URTI)
- Urinary tract infection
- Skin Infection
- Lower Respiratory Tract Infection (LRTI)
- Watery diarrhoea

During the month of March 2020, upper respiratory tract infection (URTI) was the highest reported acute health condition with a proportional morbidity of 33%. Trend in acute health conditions varies as a result of clinic accessibility challenges.

#### Key Chronic Health Conditions

- Hypertension
- Diabetes
- Asthma
- Cardiovascular disease
- Ischaemic heart disease

During the month of March 2020, hypertension, diabetes and asthma were the highest reported chronic health conditions with a proportional morbidity of 44%, 23% and 21% respectively. Trend in chronic health conditions varies as a result of clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate therapeutic outcomes which necessitates enhanced accessibility of those morbid diseases to the health care facility.
Health Analysis Report
Rukban Clinic - March 2020

3 Reproductive health data
- December: 1,063 referrals
- January: 983 referrals
- February: 974 referrals
