<tbody>
<tr>
<td>Welcoming participants</td>
<td>- Welcoming and discussing the Agenda.</td>
<td></td>
</tr>
<tr>
<td>Updates from the National Protection team</td>
<td>- Many agencies are providing their services and programs for CP during COVID-19. Services include some of the following activities: working remotely to provide services for children, creation for awareness materials and prevention measures shared by social media, non-formal education, distribution of kits, communication with communities, PSS services, sport services, positive parenting sessions, monitoring situation of children by legal partners and UNHCR, case management and trainings for social workers.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Updates from the National Protection team: several points were discussed by national team including FPD, MoSD, MoH and national NGOs.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- There are several efforts being done for CP but there are still many cases that government could not support due to shortage in staff, and lack of access to permits for civil society organizations.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- FPD said that the number of cases of domestic violence did not increase, many reasons can lead to this as some cases cannot report or are scared to report. Government is compiling numbers of helplines to protect families and children.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- The workload on the government is high and the number of social workers is limited. Therefore, there is a need for other organizations to support the government during this time. Social workers working for the government obtained permits to start working on the 13th of April .</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Agencies can share their hotlines to be collected and added.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• NCFA: to provide government hotline numbers.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• All presentations will be shared.</td>
</tr>

| CPIMS Task force  
Q1 report  
Guidance documents developed | - CPIMS developed a data report during the period of the lockdown.  
- 5 main types of child protection concerns were shared in the report.  
- Majority of cases considered to be neglect. Usual report is generated every quarter. Generate a report for COVID-19 data, lower cases were registered during this period 151 cases only comparing to more than 400 in the past (a decrease of 62 per cent).  
- Breakdown for protection also is lower. Main locations: Irbid, Amman, Camps then other locations.  
- CP case management guidance note for COVID-19 was ready and presented to the working group.  
- Looking at different issues for CP during this period in addition to preventions. It’s a guidance for case managers to use.  
- Tips and techniques and approaches for who work remotely.  
- Resources from MoH including hotlines. Information on when to engage FPD.  
- To provide guidance to partners especially Makani partners and not to be involved on a personal level but to make sure that safe referrals are used. | • Q1 report will be shared |
|---|---|---|
| **Child and Family Hotline updates** | - **JRF**: help line is confidential and free of charge, it is available from 9 am until 8 pm. Provides counseling and referrals focusing on women and children. In addition to helping families in parenting and cases who are exposed to abuse.  
- Experienced professionals are involved and provide services.  
- After the call is received, the issue is addressed internally if case needs psychosocial support or externally through emails or WhatsApp or phone calls. |  
- Total calls: 704 calls were received. Most calls were from Amman but also some calls were received from other governments.
- Parentages: 59% males and 41% males. Adults 80% and only 20% children because of the current situation.
- Received calls regarding violence and abuse, medical services, financial aid and many other topics.
- Most cases are referred to Takiyet Um Ali and FPD.
- Some of the Challenges are lack of services and telecommunication related issues.
- Health related cases goes to 911.
- Academic problems are related to online education and time management.
- Received high risk cases.
- Syrian cases: 2 cases from Syrian children facing traumas and referred to psychologists.

**Discussion on Child Labor during COVID-19**

- ILO: increase economic stress that will possibly have impact on children. ILO focus on ITS (informal tented settlements) in farms that include children working in farms. New cases are coming up it is hard to monitor some of them in the meantime. Case management is ongoing by telephone and trying to find new ways for informal education by phone.
- PPE kits delivered in collaboration with UNICEF to farms with a guidance on how to use them. Guiding families on different family assistant programs.
- ILO send messages to families to prevent children from working. If it is difficult to stop children from working, then at least they should be provided with hygiene kits and masks to stay safe.
### Updates from the field coordination structures

- **Azraq camp**: coordination meeting last week, agencies still working remotely. Few staff are on the ground, coordination with FPD and hotlines are available. Main challenges: GBV reporting is law and this raise concerns on how to access these cases. Increase of child labor in the camp as children are out of school. Partners are working on it and cases are referred to case management. For newborn children: in cooperation with hospitals, working remotely to add children to UNHCR system.

- **Zaatari camp**: continuing to work remotely. Good cooperation with FPD. Challenges: identification of cases. New CP cases were identified through hospitals which is a big concern. Feedback and request from parents that children are not fully understanding what is happening, working closely with MHPSS. There is remote participation of children in Zaatari. Coverage quality is poor, and families cannot afford to pay for internet. Coordination with UNICEF, telecommunication companies, ministries and donors to solve this issue.

- **Irbid office**: CP service provider are providing case management over phone. Challenges identifying new cases and cases suffering from lack of financial support. Majority of cases are received through referrals and it is challenging to identify CP cases in specific.

### Updates from the partners Guidelines for child protection for COVID-19

- **ILO**: need to provide food packages, zoom meetings with families, follow up with the online education. Managed to get in touch with MoE. Children facing challenges due to the new method of online education. Teachers and children need trainings. Lack of Internet. Collaboration with MoH in providing COVID-19 tips and posters. Online Yoga lessons to some of the students and their families.

- **MECI**: teachers had an online training on virtual learning and using Zoom, Skype etc.

- To avoid duplications, create a group and develop guidelines to share it at once.
