AFGHANISTAN: ESNFI CLUSTER WINTERIZATION UPDATE
APRIL 2020

KEY MESSAGES

Winterization provides life-saving assistance to the most vulnerable individuals, preventing mortalities from cold-related sicknesses, especially for children and the elderly.

A timely winterization response will mitigate protection needs (especially for the elderly, women and children) and reduce negative coping mechanisms.

The joint winterization strategy calls for an integrated response with Food, WASH, Health and Protection clusters and advocates for the use of standardized assistance packages.

Humanitarian community to contribute to research on alternate sustainable winterization solutions for protracted IDPs that address recurrent seasonal changes.

Priority of Winterization assistance

- Priority 1
- Priority 2
- Priority 3

Households targeted

- 100
- 1,000
- 5,000
- 10,000

Remaining households in need

- 100
- 1,000
- 5,000
- 10,000

# of targeted households in need of winterization response: 95,350

# of households assisted with winterization response: 76,589

# of targeted households not reached with winterization response: 18,761

% of households assisted: 80%

% of available funding: 80%

Total funding required to assist remaining households in need of winterization response: $4,315,030

Funding available to assist targeted households in need of winterization response: $95,350
