**Risk Communication**
ADR (ACTED, COERR, JRS, HI, IRC, SCI, FilmAid, MI, UNHCR, TBC)*

**Key Issue** Timely outreach to refugees in context of social distancing: limited phone and internet access

- Ongoing sharing of COVID-19 prevention and response messages in Karen and Burmese languages with refugees, including those with specific needs, through over 7,000 small group dialogues, as well as distribution of posters, leaflets, PA system announcements, videos and web links. Weekly media monitoring reports distributed
- Training provided for over 200 RCCE community engagement workers in all nine camps, including on home visit protocols from the protection working group along with session guidance
- Guidance for vulnerable families on mental health and wellbeing under development in coordination with the health sub-committee and psychosocial working group
- Over 40,000 cloth masks and 1,700 hygiene kits distributed to refugees. Procurement process for an additional 94,000 masks and 15,000 hygiene kits underway. Leaflet about hygiene kit content and guidance using cloth masks developed and integrated into kit and mask distributions. Support provided to Vocational Training centres in Mae La and Umpium camps to produce cloth masks. Distribution of soap to 5,103 EVIs (2 bars each) completed. 10,346 soap bars distributed
- PSEA and SGBV messaging being integrated into loudspeaker announcements
- Bi-weekly feedback and complaints mechanism developed and integrated into existing activities in camps. Over 600 surveys already completed

**Case Management**
IRC (MI, CDC)*

**Key Issue** Currently no secured testing or referral facilities for 4 camps (~32,000 people) in Mae Hong Son Province

- Presently locating and preparing COVID-19 isolation and treatment facilities
- Engagement with Shoklo Malaria Research Unit to organize training and finalize process to facilitate testing for Mae Hong Son camps, if required
- Initiated development of case management protocols, including transport of testing specimens
- Ongoing procurement of pharma and supplies
- Enacted measures to reduce overall patient load at health facilities

**Surveillance, Case Investigation and Outbreak Rapid Response**
IRC (MI, CDC, WHO, MOMHi, MOI)*

**Key Issue** Different approaches to entry screening and quarantine measures applied across camps; potential under-reporting

- Displaced Persons in Thailand Guidelines for Prevention, Surveillance, Investigation, and Mitigation of COVID-19 under review by MOPH
- Position Paper on Quarantine Practices in the 9 Temporary Shelters developed, together with Food and Protection pillars
- All surveillance staff trained and applying current MoPH case definition
- Triage conducted at all camp hospitals to cohort and screen patients with symptoms
- Community surveillance systems operating, and community quarantine areas established in all nine camps
- Ongoing support to Thai officials to conduct regular screening and screening at entry/exit gates
- Contact tracing training for community health workers completed in some camps and ongoing in others
- Transit isolation rooms identified and ready for patients awaiting referral, expansion of number of beds available in camps for suspected and confirmed cases and surge capacity being explored

**Infection Prevention and Control (IPC)**
IRC (MI, CDC)*

**Key Issue** Unpredictable supply of personal protective equipment (PPE)

- Six-week stock of PPE equipment in place and monthly supply of surgical masks provided by MoPH for all nine camps
- COVID-19 SOPs under ongoing development and ongoing training all health care staff in nine camps
- COVID-19 SOPs for isolation and treatment under development, facilities set up and simulation exercise and training ongoing
- Decontamination SOPs under development and training initiated in certain camps
- IPC detailed refresher training delivered to local authorities and camp security
- Soap and water supplies provided to support continuous operation of handwashing at camp entry/exit points
- Handwashing stations in place in public areas, prioritized for most frequently visited areas and schools
- Hand hygiene at household level supported by community engagement team
- Ongoing production of face shields and reusable PPE, including scrubs and surgical gowns

**Food**
TBC

**Key Issue** Increasing vulnerability and dependency on assistance in the long term

- COVID-19 transmission mitigation measures implemented by food vendors, suppliers and warehouses
- Food vendors provided with soap, alcohol and bleach to sanitize shops
- Handwashing stations installed at shops and warehouses
- SOPs for quarantine/isolation conditions developed, in coordination with nutrition teams, health actors and camp committees. Training of camp staff in kitchen operations to support health agency quarantine/isolation facilities ongoing
- Strategy developed to ensure refugees’ continued access to basic food items and cooking fuel
- All households to receive Most Vulnerable food rations for a minimum three months (April to June) to help alleviate loss of informal income opportunities, with support from July onwards contingent on receipt of additional funding

**Protection and Advocacy**
UNHCR (CCSDPT agencies, KWO, KnWO, KRC, KnRC)*

**Key Issue** Inclusion of refugees in national surveillance, response, and planning and protection mainstreaming

- Continued advocacy on inclusion of refugees in the RTG’s national surveillance, response and planning activities for COVID-19
- Supporting mainstreaming of protection in the work of other pillars, including mitigation of SGBV and PSEA risks
- Ensuring continued delivery of protection services for the most vulnerable, including through collection and review of vulnerability data
- Ensuring continued regular and effective protection monitoring, including access to reporting channels for SGBV survivors and other serious protection cases. Update of SGBV referral pathways completed in all camps, as well as provision of some material support
- Delivering technical support for remote case management to camp-based staff and CBOs to ensure continuity of protection services
- Development and distribution of child-friendly material on COVID-19, including learning materials, hygiene sets and guidance for parents
- Strategy to support safe anticipated reopening of schools in camps including ‘back to learning’ campaign under development
