General update

CCCM partners have either completed or have ongoing risk communication activities (awareness raising on COVID-19) in 881 IDP sites out of 2,344 IDP sites nationally, covering 1,033,403 persons (40% out of total 2.6 million). Partners closely worked with Camp Management Committees to conduct specifically designed sessions for vulnerable groups such as (marginalized communities, elderly persons/people with underlying medical conditions). Partners collaborated with local and international radio broadcasts to make sure that COVID-19 messages would reach IDP communities in Baidoa and Hargeisa.

Site maintenance committees (SMCs) were able to rehabilitate communal infrastructure in 8 IDP sites in Badhan and 4 sites in Kismayu through incentivized approaches. Additionally, IDPs in Midgagale sites have been informed on how to mitigate the impacts of flooding. In a clean-up campaign in Dollow and Bossaso, IDP communities engaged in site cleaning activities.

Evictions risk mapping exercises were conducted by partners which resulted in Buale IDP site in Kismayu being evicted. Therefore, partners were able to intervene and conduct eviction prevention activities. Similarly, in Baidoa and Benadir, eviction alerts have been raised and shared with relevant sector coordinators and local authorities for further advocacy. 372 IDP sites in Baidoa have been monitored by partners to assess continuity of services during the COVID-19 outbreak while in Galkayo, partners verified 30 sites.

1,101 cases were received at complaints feedback mechanism (CFM) information desk or through hotlines managed by partners in Kismayu, Baidoa and Dollow. In addition, 160 of these cases were closed with successful referrals occurring to various partners operating at the site-level.

In Hudur and Benadir, partners established IDP site governance structures for 28 sites whereas in Berdale in Bay region, 4 sites have been targeted with similar activities.

Operational presence of cluster partners

Overall Objective

To improve the living conditions and protection of IDPs in sites and settlements and ensure equitable access to services and assistance of all persons in need, with a clear focus on moving toward attaining durable solutions with full participation of the displaced and host communities.

Baseline data

2.6 million IDPs in Somalia

2,300+ IDP sites in Somalia

Gaps

- Restricted humanitarian access in some parts of south and central Somalia
- Lack of information on service provision at site level
- Lack of land tenure and forced evictions inhibit the ability of partners to improve living conditions in sites
- Low levels of community participation and AAP inhibit ability to improve beneficiary targeting to
