### Age Groups

- **Children**: 23.5k (60%)
- **Adults**: 15.4k (40%)
Sudanese refugees have arrived in successive waves, in 1997 and from 2011 to the present. UNHCR is providing humanitarian assistance to Sudanese refugees in five camps in the Benishangul-Gumuz Regional State in Ethiopia.

The registered refugee population in the Benishangul-Gumuz Region stands at 39,985 individuals, of which 65.5% (42,945) are Sudanese, 33.2% (21,808) are South Sudanese, and 1.31% from other nationalities. In the first six months of 2020, a total of 1,700 new arrivals were received out of which 1,483 were registered before the closure of the border; the remaining 218 new arrivals were received after the border closure. To curb the spread of COVID-19, Ethiopia closed its land borders in March and the Government issued the State of Emergency soon after. Movement restrictions have been enforced, and refugees who have arrived in the Benishangul-Gumuz Region from other parts of Ethiopia or other countries have been quarantined. Benishangul-Gumuz Region is one of the Regions affected by COVID-19. The overall security situation is relatively calm and most protection and assistance activities in the Refugee Camps have continued without any major disruptions except the delays of food arrivals.

Break Out Box – Good Practices and Innovative Approaches

UNHCR’s SGBV partner IRC developed a mobile application for conducting a Safety Audit to map SGBV risks remotely and regularly. The Kobo App will be used to conduct assessments through mobile phones, tablets, or laptops, allowing SGBV teams to collect data on refugee women’s and girls’ protection concerns during the COVID-19 pandemic.

A livelihood project on face mask production was designed and implemented on a pilot basis in Tsore and Gure-Shombola refugee camps with the possibility of replicating and upscaling the best practice in other camps as part of the COVID-19 response. The project supported established IGA groups comprising 20 refugees (2F/18M) with on-the-job training, startup kits, and seed money to maintain future productions. It aims at improving inclusive health, wellbeing, and improved livelihood opportunities for the community through empowering production and preventing the spread of COVID-19.

CHALLENGES

Due to the US Travel Ban in 2017, many Sudanese cases in the resettlement pipeline have been affected and their cases did not move forward for more than 3 years calling for more advocacy.
STRATEGIC ACHIEVEMENTS

KEY ACHIEVEMENTS TOWARD STRATEGIC OBJECTIVES

UNHCR and its partners prioritized the provision of basic needs and essential services to refugees in the camps and surrounding host communities while ensuring that the minimum standards were met within the respective sectors. The COVID-19 outbreak has put a strain on service delivery including some protection interventions and the implementation of durable solutions. Innovative approaches were employed to redefine and align various community engagement and assistance activities with the precautionary measures outlined by WHO and Government of Ethiopia guidelines.

Community-based child protection structures have been strengthened to offer basic psychosocial support services to vulnerable children in their respective communities within the camps. A Business Continuity Plan (BCP) for SGBV was designed, redefining the way the operation does business during the COVID-19 pandemic. Case management services continued, though beneficiaries could not access the safe space services as a COVID-19 prevention measure. Incidents’ reporting was carried out through mini-media platforms and home-to-home visits. Caseworkers were trained on remote case management to ensure that victims of domestic violence receive adequate support and assistance.

Water systems in Abrahamo, Homosha, Bambasi, and Tongo provided an average of 20,73 liters per person per day. Also, the household latrine coverage reached 65%. In response to the COVID-19 pandemic, 2,407 handwashing facilities were established. A mixed approach was implemented to provide refugees with alternative sources of energy for cooking, and at the same time mitigate the degradation of the natural environment. Furthermore, Ethiopia’s new refugee policy which grants refugees greater rights including the right to undertake livelihood activities and inclusion within the national development system was well received by refugees and appreciated by UNHCR and its partners.

In line with the national ambition to implement the CRRF to enhance livelihood opportunities for refugees, and economic inclusion pilot project in Bambasi Refugee Camp and an agricultural assistance program in two other refugee camps were rolled out.

KEY ACHIEVEMENTS TOWARD CROSS CUTTING COMMITMENTS

The promotion of peaceful co-existence among the refugees and surrounding host communities’ peaceful coexistence was among the cross-cutting issue achieved by the Assosa operation. The secondary school constructions aimed at benefiting both refugees and host communities are in good progress in Tsore, Bambasi, Sherkole, and Tongo. The host community has got access to safe water in Homosha town and the Abrahamo reception center. Given addressing the COVID-19 challenge, support was provided to Assosa prison with a regular visit, provision of hygienic materials(such as soap) while NPIs were provided to two border woredas (Kurmuk and Sherkole) for the same purpose.

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

Following the outbreak of the pandemic, awareness-raising was conducted to the entire refugee community on COVID-19 prevention. The challenge is the closure of quarantine centers and the limited capacity of existing health facilities in camps thus affecting the prevention and response activities. The COVID-19 situation also negatively impacted the movement of refugees for different reasons such as engagement in IGA and other livelihood activities in the host community.

FOCAL POINTS

68.0 SGBV cases were reported (66 F/ 2 M) and provided with timely and confidential services.

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

Besides, Covid-19 mass awareness-raising campaigns are being conducted in all camps. This is done in collaboration with other partners and COVID-19 camp-based task force teams. 68 (66 F/ 2 M) SGBV cases were reported and provided with timely and confidential services; psychosocial counseling, medical, protection, and legal services and material support in Assosa Operation with established clear reporting and referral systems. However, the regular community wellbeing initiative activities involving large gatherings were suspended for one month because of COVID-19 impacting negatively on the SGBV prevention and response efforts.

During the reporting period, 114 Sudanese refugees from the Sherkole and Bambasi Refugee Camps in need of resettlement were identified of which 67 cases were submitted to the resettlement countries, and durable solutions recommended for the best interest determination reports.

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

A change of policy by the US government in 2020 with the suspension of quota for vulnerable refugees impacted the RST opportunities. With the limited quota allocated to Assosa, 71 cases with 310 individuals have been submitted to other resettlement countries, which is 77.5% of this year’s quota. 25 Sudanese refugees have already departed to third countries. The low departure is caused by the COVID-19 pandemic. In the area of CP, Community based child protection structures have been strengthened by redefining their roles and responsibilities to target the challenges arising from the Covid-19 pandemic.

PROGRESS ON INDICATORS

Woosha HABTIE Assistant Protection Officer

- 64.0% of students the children accessed primary education.
- 97.0% of students the children accessed pre-primary education.
- 20.0% of students the children accessed secondary education.

**KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES**

16,121 children were enrolled in ECCD, primary, and secondary schools before the closure of schools in March 2020. Within the context of COVID-19, teachers carried out home visits to support students and monitor progress, however, self-learning materials are urgently required in the camps. UNHCR and education partners worked on developing alternative learning approaches to support refugees, collaborating with UNICEF and the Regional Education Bureau to provide summer diploma courses for incentive primary teachers. To ensure continuity of learning, radio and print media-based learning initiatives were introduced, and refugees in Grade 8-12 were supported with preparations for the national examinations. New schools are being constructed in Tsore and Bambasi to support both the refugees and students from the host community, and classrooms are being expanded in Sherkole and Tongo secondary schools. Additional resources for new construction and expansion are required to meet the standards for students’ classroom ratios.

FOCAL POINTS

BAYISA Abiyot Asst: Public Health Officer

47.9k Medical consultations were conducted out of which 19.2% were patients from the host community.

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

In four out of five camps, one health care center is available with a permanent structure serving refugees and host communities. The fifth health care center (Gure-Shombola Health center) is semi-permanent, and UNHCR is planning on upgrading the center to a permanent structure this year. Generally, the health status of the population improved through the implementation of holistic primary healthcare which included components of health promotion, disease prevention, and curative services. 47,909 medical consultations were made in the outpatient department. 645 patients were admitted to the camp health centers and received in-patient services, whereas another 279 patients were referred to a secondary and tertiary health care facility.

As a result of awareness campaigns, a significant improvement was observed for the number of live births attended by a skilled professional. More than 100% of the births were attended by skilled personnel in the camps. Routine immunization coverage for measles was reported at 100%, attributed to linkages between nutrition center, and improved EPI defaulter tracing. 97 patients received Anti-Retroviral Treatment services. To prevent malaria-related morbidity and mortality, 19,400 treated mosquito nets were distributed to three camps. To prevent and respond to the COVID-19 pandemic, 58 health professionals were trained on COVID-19 management. Screening refugees for COVID-19 at the health center, during general food distribution and house-to-house screening, was conducted in all 3 camps.

FOCAL POINTS

Simienen GEBEYEHU Asst. Wash Officer

The installations of handwashing facilities were made to support the handwashing efforts against COVID-19, and key massaging on the WaSH activities was carried out against the COVID-19 prevalence.

67.4% of households have now access to household latrines in camp.

20.7 liters of water per person per day

It was possible to provide a safe water supply to the refugees in Assosa camps. This was made through the upgrading of water sources and chlorination of water before distribution.

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

For continuation of the safe water access to the refugees, it was possible to develop water supply systems at the Abrahamo transit center, in part of the Homosha town/Sherkole camp and Tongo camp, as well as Bambasi camp. Refugees were also able to access water at water points while a tap was serving to 61 refugees. The average daily water access per capita to the refugees was 20.73 liters per person per day. The free residual chlorine was checked daily to be between 0.2-0.5 mg/lit at the water point level that ensured a safe supply of water to the refugees and nearby host communities. The household latrines coverage in the camps was at 65% which made 7 refugees use the drop hole of the latrine. The number of refugees per waste pit was 3639 refugees for solid waste management. The number of refugees per hygiene promoters was 765 refugees in the awareness-raising efforts in the camps. The key messaging of the COVID-19 preparedness and response through megaphones, mini media, and community workers was conducted to engage the communities against the COVID-19 pandemic. A total of 2407 handwashing facilities were installed across the camps to ensure proper handwashing practices at critical handwashing times against COVID-19. The major gaps in the operation included the aging of the generators and pumps, shortage of water collection and storage containers, and lack of household latrines for 35% of the refugee households, shortage of megaphones, generators, and loudspeakers for providing key message dissemination access to the refugees. Moreover, the COVID-19 response required additional resources to support the refugees and nearby host communities.

FOCAL POINTS

- GAZARWA, Dorothy Nutrition Officer
- Abiyot BAYSA Asst. Public Health Officer

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

In coordination with ARRA and WFP, UNHCR monitored the monthly general food distribution conducted across the camps. An average of **39,973 refugees** received their monthly rations both in-kind and cash. Refugees received **13.5 kilograms per capita per month** which is below the minimum requirements of daily kilocalorie intake per capita. With the available funding, small-scale livelihood and agricultural activities were supported including backyard gardening thereby improving access to vegetables and proteins. However, continued advocacy on increasing the general food distribution entitlement, and resource mobilization to strengthen livelihood activities is necessary to positively impact the lives of persons of concern.

### KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

Refugees were provided with basic NFIs during the reporting period, including laundry soap, women sanitary kits for new arrivals, and to the existing population the three camps of Tongo, Sherkole, and Bambasi.

All new arrivals received kitchen sets, blankets, sleeping mats, and jerry cans. 97.6% of persons of concern received **450 grams of soap per person per month** to enhance hygiene. **5,000 pieces of soap** were distributed for communal handwashing facilities, and **2,500 pieces** donated to the Benishangul-Gumuz prison office. Dignity kits were distributed to **16,534 women and girls of reproductive age 11-49**, representing **25.36%** of the population. The quarantine centers in Bambasi and Tsore camps have been equipped with blankets sleeping mats, plastic sheets, and buckets. The replenishment of worn-out CRIs remains a significant gap in the operation.

### PROGRESS ON INDICATORS

**OBJECTIVE : 1** Population has sufficient basic and domestic items

### CHALLENGES

Due to the COVID-19 situation, the distribution of laundry soap increased by 25%. This has caused a shortage in the warehouses.

POCS MAINLY FROM SUDAN IN WESTERN ETHIOPIA

UNHCR ETHIOPIA : REFUGEE RESPONSE PLAN
KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

Ethiopia’s new refugee policy which grants refugees greater rights including the right to undertake livelihoods activities and inclusion within the national development system has been well received by refugees. Several partners were involved in undertaking livelihood activities including an economic inclusion pilot project in Bambasi Refugee Camp, and an agricultural assistance program in two other refugee camps. UNHCR provided agricultural livelihood assistance and technical skill training across all the five camps, with 911 refugees trained on crop and vegetable agronomy and production training. Livelihood opportunities are, however, limited due to scarce financial resources.

UNHCR and partners supported 2,508 refugee and host community households in Sherkole, Bambasi, and Tongo camps, providing agricultural resources and inputs such as seeds and agricultural tools.

PROGRESS ON INDICATORS

OBJECTIVE : 1 Self reliance and livelihoods improved

CHALLENGES

Depilation of natural resources has also affected the livelihood of the host community.

Due to limited livelihood opportunities causing food shortage refugees are engaging themselves in unsafe income activities. E.g. Deforestation.
COVID caused price inflation on livelihood resource items particularly on apiculture related resources and resulted in budget revisions.

FOCAL POINTS

KEY ACHIEVEMENTS TOWARD SECTOR OBJECTIVES

A mixed approach initiative has been implemented to provide refugees with alternative sources of energy for cooking, and at the same time mitigate degradation of the natural environment. As part of this initiative, several resources were provided such as the distribution of charcoal briquettes, the communal kitchen at Tsore and Sherkole camps, and the provision of firewood to Gure-Shombola camp.
