

## Response to Q4 '20 feedback - 2020-2021 RRP Performance Tracking (Mar'21)

The following changes have been made to the ActivityInfo platform based on feedback received after the Q4 2020 reporting cycle.

### General changes / clarifications

- Changed monthly reporting field to date picker format (with date validation set to “within 2021”to avoid mistakes)
- Financial tracking has been moved to ActivityInfo to replace the Excel template
- All reporting locations previously listed under Arua (except for sub-counties) have been moved to “Madi Okollo & Terego”. Only sub-countries are listed separately under Madi Okollo and Terego respectively.
- User-added locations (WASH infrastructure, schools etc.) have been moved from standard location lists (districts, settlements etc.), going forward partners can only add locations for Education and Environment & Energy

### Sector specific changes / clarifications

#### **CBI**

- “Total” fields for reporting on PSN support have validation to ensure consistency with the disaggregation by type (selecting the PSN type is now mandatory)
- For one-off assistance and the first round of repeat assistance, partners are now prompted to select "New beneficiaries" under “Select Assistance Type”. "Existing beneficiaries" should be selected when beneficiaries of repeat assistance have already been reached this year in order to avoid double counting.

#### **Child Protection**

- Number of CPCs, caseworkers and open cases are now calculated using the latest reported value instead of highest reported value
- Number of BIAs conducted will be used to count children benefitting from case management
- “Total” fields have been added for validation to ensure consistency with the disaggregation by age and sex for open cases, case management and community-based support

#### **Environment & Energy**

- Switched from reporting by month to quarterly reporting
- When reporting on Cash for Work, the fields have been clarified so that the daily rate is captured as follows:
  - Cash value of transfer per person / per day (in UGX)

#### **Education**

- Switched from reporting by term to quarterly reporting

#### **Livelihoods & Resilience**

- For one-off assistance and the first round of repeat assistance, partners are now prompted to select "New beneficiaries" under “Select Assistance Type”. "Existing beneficiaries" should be selected when beneficiaries of repeat assistance have already been reached this year in order to avoid double counting.
- When reporting on Cash for Work, the fields have been clarified so that the daily rate is captured as follows:
  - Cash value of transfer per person / per day (in UGX)

## **Response to Q4 '20 feedback - 2020-2021 RRP Performance Tracking (Mar'21)**

### **Protection**

- PSN support is now calculated based on the reporting under Protection only going forward in order to avoid overlap (instead of adding PSN support tracked under CBI and SSNFI)
- "Total" fields for reporting on PSN support have validation to ensure consistency with the disaggregation by type (selecting the PSN type is now mandatory)
- Switched from reporting by month to quarterly reporting

### **SSNFI**

- Switched from reporting by month to quarterly reporting
- "Total" fields for reporting on PSN support have validation to ensure consistency with the disaggregation by type (selecting the PSN type is now mandatory)
- When reporting on Cash for Work, the fields have been clarified so that the daily rate is captured as follows:
  - o Cash value of transfer per person / per day (in UGX)
