Quarter 1

Uganda Refugee Response Plan (RRP) 2020-2021

January - March 2021

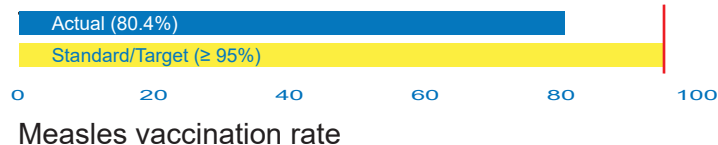

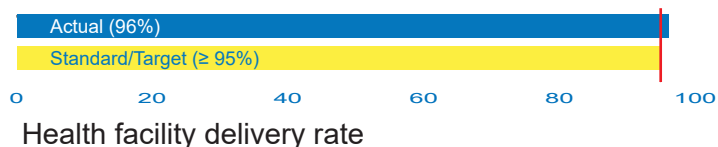

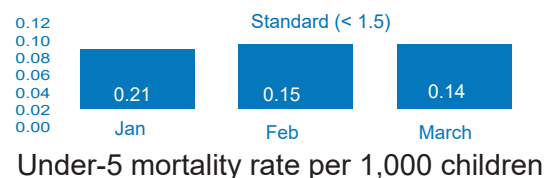

Overview

The sector's main objective is to ensure full integration of comprehensive primary health care services for refugees into national and local government systems, in line with the Health Sector Integrated Refugee Response Plan (2019-2024), launched in January 2019.

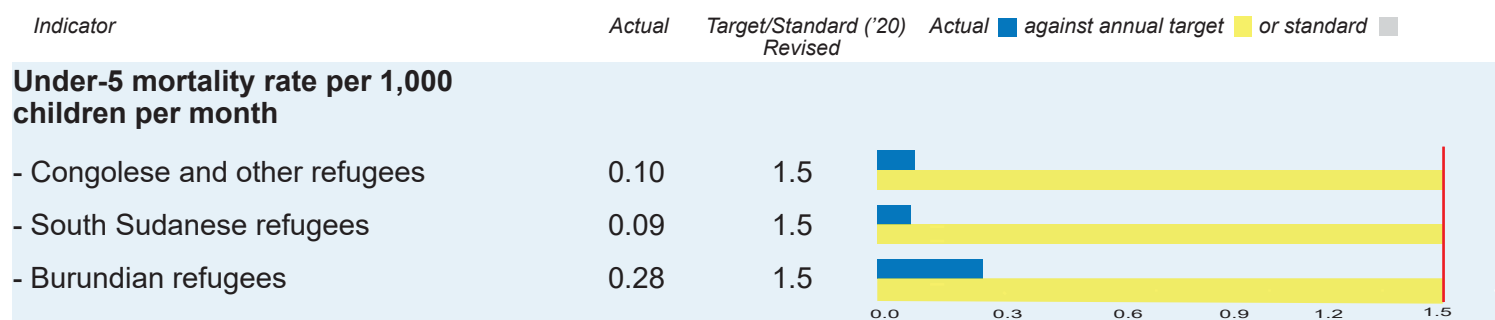

Provision of the minimum health service package for all refugees is a key priority, with an emphasis on preventive and promotive health care for new refugee arrivals at entry points, transit and reception centers and during their initial stay in settlements. This package includes vaccination, nutrition screening, emergency referrals and provision of life-saving primary health care services, in addition to surveillance and response measures for disease outbreaks.

Mortality has declined from January at 0.21 to 0.14 in March 2021 and it is attributed to the implementation of Integrated Community Case Management of childhood illnesses. Overall GAM rate is at 5.05% which is slightly above the acceptable standard of 5% with the major challenge is anaemia which is high at 55.4%.

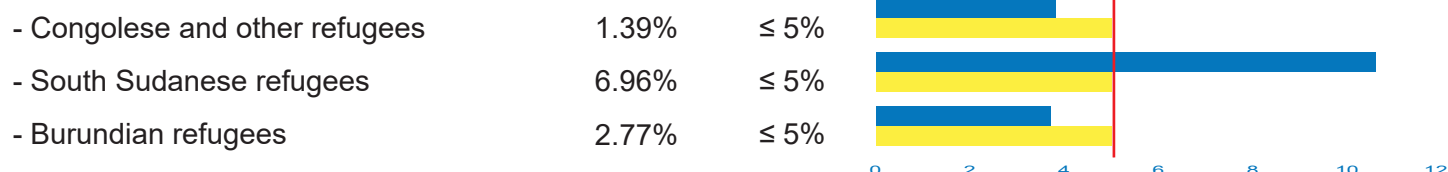

Key indicators

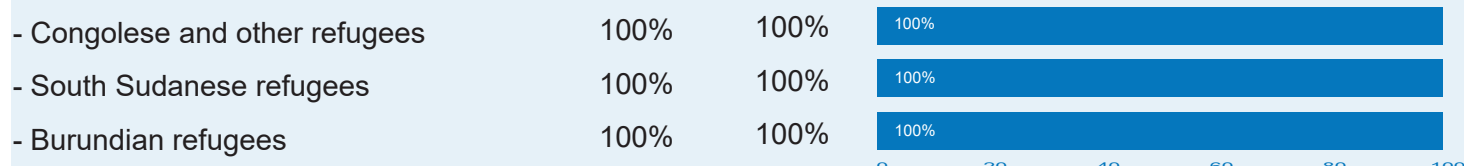

Objective: Provide emergency life-saving health and nutrition interventions for new refugee arrivals and strengthen outbreak preparedness and response

Global Acute Malnutrition rate

Sites holding monthly coordination meetings
