* An additional 657,680 individuals received USD 36,618,294 in cash assistance for winterization in 2021. For more information, please refer to the Final Report for UNHCR’s 2020-2021 Regional Winterization Assistance Plan for the Syria and Iraq Situations.

\(^1\) All figures are reported cumulatively for the year, with achievements reported on a quarterly basis.

\(^2\) The term unique individual applies to the calendar year. UNHCR counts unique individual as those that were added after Q1. When reporting the figures for a given quarter, individuals assisted in earlier quarter(s) of a given year will therefore not be counted.

\(^3\) To address the economic hardship compounded by the pandemic, as well as other protection needs, for a total of USD 8,684,502. The remaining 353,792 individuals were assisted with other types of sectoral CBI, including grants towards health care and education.
Background and operational highlights

During the second quarter of 2021, cash-based interventions (CBI) were implemented in 15 MENA operations as well as Turkey, all of whom delivered multi-purpose cash assistance (MPCA) for basic needs and one-off emergency support. In addition, livelihood grants were delivered in Egypt, Mauritania, Morocco and Turkey, health grants in Jordan, education grants in Jordan, Lebanon, Mauritania, Morocco and Turkey, and shelter grants in Lebanon and Yemen, in addition to other sectoral support such as cash for youth, adolescents and GBV survivors in Turkey.

Additional support to address the economic impacts of COVID-19 continued throughout Q2 in nine countries (Egypt, Israel, Jordan, Kuwait, Mauritania, Morocco, Saudi Arabia, Turkey and Yemen), compared to 14 countries at the end of 2020, due in large part to the streamlining of the COVID-19 response into regular CBI activities.

2021 strategic priorities

In support of the regional strategy for CBI operations in MENA for the years 2021 and 2022, during the second quarter of this year UNHCR MENA focused on:

- **Expanding standard CBI post-distribution monitoring (PDM) tools** and transitioning towards harmonized and predictable targeting approaches: UNHCR continued to expand the use of standard PDM tools for CBI, which have now been adopted across six operations (Egypt, Jordan, Lebanon, Syria, Turkey and Yemen). The use of standard PDM tools allows operations to report against a set of comparable indicators, among other outputs. Expansion to additional operations will continue throughout the 2021.

- **Advocacy for the financial inclusion** of UNHCR’s persons of concern into national social safety nets and social protection schemes: Starting from Q2, CBI activities for the region are being complemented by the efforts of the MENA Bureau’s Inclusion Taskforce, which works towards furthering the social and economic inclusion of refugees in development and social protection programmes through systematic policy, planning and technical guidance within operations falling under the Iraq and Syria situations (i.e. Egypt, Iraq, Jordan, Lebanon, Syria and Turkey). The objective of these efforts towards economic inclusion is to support the integration of beneficiaries of UNHCR’s CBI programmes into national social protection schemes.

- **Strengthening implementation systems**: During Q2, the deployment of UNHCR’s Cash Management System ‘Cash Assist’ continued. This integrated software solution allows for all steps of cash delivery—from attribution of selection criteria, to preparation of beneficiary lists, to automatic reconciliation of cash deliveries—to be managed through a single software platform. Cash Assist is being rolled out globally in all UNHCR operations that directly implement CBI. During Q2, Cash Assist was progressively deployed in Egypt, Iraq, Israel, Morocco, Syria, Tunisia, and Yemen, with roll-out across the remaining operations (Algeria, Lebanon, Libya, Turkey and GCC countries) forecasted for 2022.

- **Aligning UNHCR’s cash assistance programmes with national social safety nets and social protection schemes**, in close collaboration with partners.

- **Undertaking sectoral studies** to enhance analysis and evidence-based programming for CBI (see “Protection needs” section below).

- **Continued integration of CBI with case management** and other protection services.

---

4 UNHCR operations in Turkey related to the Syria and Iraq situations are included in this MENA update.
UNHCR cash operations in MENA in 2021 – budget and number of individuals reached by country, COVID-19 response only

Total individuals assisted: 151,949
Total USD distributed: 8,684,502

Syrians: 87,285 (51%)
Other nationalities: 64,664 (49%)

Syrians: 4,254,081 (64%)
Other nationalities: 4,430,421 (36%)
Needs

Protection needs

During Q2, UNHCR completed a regional study on the use of CBI in support of protection outcomes across 15 operations in MENA as well as Turkey. The study documented how in the region and in the organization at large, UNHCR’s CBI address protection needs in three primary ways, namely through: (1) Protection mainstreaming – by ensuring the safe and dignified delivery and use of CBI; (2) Providing CBI for basic needs, by delivering assistance to ensure access to basic goods and services, with a range of positive protection outcomes; (3) Providing CBI to address specific protection purposes, in areas such as education, Gender-Based Violence (GBV) or child protection. The mapping also found a strong complementarity between CBI and protection services, with at least 50 per cent of CBI recipients receiving protection services. 5

The study—which also took stock of earlier MENA child protection and CBI interventions—presented an overview of UNHCR’s CBI in MENA, outlining how and to what extent they contribute to protection outcomes and shedding light on the role of protection in targeting of CBI. Results of the study indicated the following:

- UNHCR delivers most of its CBI as support to basic needs, while also addressing the needs of individuals with specific protection concerns through dedicated sectoral CBI. Among sectoral interventions, CBI in support to education outcomes are increasing.

- Access to digital payments in the region is an opportunity to expand protection outcomes, notably as a vehicle for financial inclusion.

- PDM data indicates that most cash recipients could find what they needed in their local markets; rated CBI as their preferred modality; could safely and securely withdraw their cash; and were aware of which avenues to pursue for complaints and feedback.

- PDM data also highlighted that most respondents reported a moderate or significant improvement in their living conditions due to UNHCR’s CBI, in addition to reduced stress and anxiety. However despite receiving cash assistance, the same PDM indicated the use of harmful coping mechanisms among some recipients.

- The most common targeting mechanisms across UNHCR operations in the region include self-targeting combined with community-based (eight countries), Proxy Means Testing (five countries) and score cards (five countries). Most targeting mechanisms include persons with specific needs as selection criteria.

- Finally, there is a need to systematically document how protection is mainstreamed and enhanced throughout programme design, including by developing and analysing corresponding indicators to measure the impact of CBI activity through a specialized impact assessment model.

Refugees collect their cash grants in Amman, Jordan as part of UNHCR’s emergency distribution to 18,000 refugee families to help ease the socioeconomic impact of the COVID-19 pandemic on asylum-seeking families in Jordan. Photo by: Lilly Carlisle/UNHCR Jordan

---

6 All figures related to number of individuals assisted with cash, number of transactions and amount of USD disbursed are based on uploaded lists with the names of payees/eligible beneficiaries, which are sent to the Financial Service Provider(s) for that specific quarter, prior to any reconciliation or confirmation of withdrawal and/or reception of funds.

7 This figure corresponds to the implementation of a wide variety of CBI (see Table 1 for details) which includes MPCA for Basic Needs, Cash for Unaccompanied and Separated Children (UASC), Education grants, Livelihood Grants, Shelter grants, Health and Hygiene grants.
Partnerships

Beyond its role in inter-agency coordination for CBI in several operations, UNHCR continues to place a strong emphasis on common delivery systems and partnerships in the provision of financial assistance, in line with the December 2018 statement on cash by OCHA, UNICEF, UNHCR and WFP. This vision is fully implemented in Jordan through the Common Cash Facility (CCF), and in Lebanon through the Lebanon One Unified System for E-cards (LOUISE) platform.

Contributions from the private sector towards UNHCR’s growing Refugee Zakat Fund also continued throughout the second quarter of 2021, providing ongoing support to persons of concern in Iraq, Jordan, Lebanon, Mauritania and Yemen.
Donors:

UNHCR is grateful for the support of donors who contributed to the cash assistance programme for internally displaced persons (IDPs) and refugees in MENA with unearmarked and earmarked funds, as well as those who have contributed directly to the operations.
