The UNHCR-led PRMN implemented in partnership with NRC reported 136,000 new internal displacements in the month of February 2022. Of these, 115,000 were triggered by drought or lack of livelihood while 21,000 were related to conflict / insecurity.

Major displacements occurred in Galgaduud (14,620), Bay (5,150) and Middle Shabelle (4,700) districts particularly due to military offensive activity.

The highest displacements owing to drought were recorded in Bay (40,102), Togdheer (26,129) and Lower Shabelle (22,887) districts.

For the month of February, there were no displacements registered as a result of floods.

UNHCR is grateful for the generous contributions of donors who have directly contributed to the UNHCR Somalia operation in 2022.

UNHCR is the lead agency for the management of international refugees in the Horn of Africa, providing protection and humanitarian assistance to persons of concern worldwide.

About PRMN

The PRMN (Protection & Return Monitoring Network) is a UNHCR-led project which identifies and reports on displacements (including return) of populations in Somalia. The network also identifies and reports on protection risks and incidents underlying such movements. Only figures collected by PRMN are reported above. Not all displacements in Somalia are captured. This dashboard should be read in conjunction with the Notes on PRMN Methodology (https://data2.unhcr.org/en/documents/details/53888) which outline the approach and certain limitations. The figures shown are for numbers of individuals and are based on interviews with key informants and/or displaced households at destination (unless otherwise noted). Further information and datasets available on request use contact below.
