

Multi-Sector Needs Assessment Moldova

Education
1 July 2022

Objectives

Context: Lack of comprehensive, generalizable statistically representative assessments of refugees' needs and vulnerabilities

Support an evidence-based humanitarian response in Moldova through the provision of multi-sectoral data about the needs and coping capacities of Ukrainian refugee households in the country.

Understand household composition of refugees, including key demographics

Identify priority needs of refugee households, including health needs, education needs, accommodation needs, livelihood needs, and protection risks

Understand coping capacity and vulnerability/resilience in the event of protracted displacement

Identify household profiles with most critical needs to inform targeting

Identify needs and impact of humanitarian aid

Methodology and sampling

Population of interest

All Ukrainians in Moldova displaced due to war living in the Refugee Accommodation Centres (RACs) or in the host community. Due to operational challenges in data collection, the Transnistrian region was not included in the sampling frame.

Sampling

Probability stratified random sampling at RAC level and non-random purposive sampling at Ukrainians displaced due to war and residing in the host community in Moldova (non-RAC). Due to the limited availability of primary data regarding the number and the location of Ukrainians in Moldova living in the host community, findings for refugees living in the host community should be considered as indicative only. **Moreover, the sampling frame excluded settlements with less than 50 refugees and RACs reporting less than 20 inhabitants. This is to account for the potential operational challenges in identifying respondents in these communities. Further details about the total number of refugees living in Moldova is available on the [UNHCR Data Portal](#).**

Data collection method

Face-to-face interviews with head-of-family or another person knowledgeable about the socio-economic situation. The questionnaire included both questions about the situation of the family as well as individual members. Data was collected between May 16 – May 31, 2022.

Findings for Ukrainians living in RACs are statistically significant at 95% level of confidence and 10% margin of error. Findings for Ukrainian living in the host community (non-RAC) are indicative only.

Strata	Estimated number of families	Final Sample size (# of interviews collected)
RAC	910	130
Community	12,675	574
Total	13,585	704

Sampling frame

Community		RACs	
Raion	# of interviews	Raion	# of interviews
Anenii Noi	11	Anenii Noi	2
Balti	43	Balti	5
Cahul	3	Basarabeasca	2
Calarasi	1	Briceni	1
Causeni	8	Cahul	8
Chisinau	443	Chisinau	78
Edinet	8	Cimislia	4
Falesti	3	Criuleni	2
Ialoveni	2	Dubarasi	6
Ocnita	4	Edinet	1
Orhei	4	Falesti	6
Rezina	2	Ialoveni	5
Stefan Voda	10	Stefan Voda	2
Straseni	2	Straseni	2
Taraclia	9	Telenesti	4
Telenesti	3	Ungheni	1
Ungheni	4	UTA Gagauzia	1
UTA Gagauzia	14	Total	130
Total	574		

In total, enumerator teams travelled to 36 cities and villages to interview Ukrainians living in communities and 20 cities and villages to interview Ukrainians living inside RACs – covering 39 RACs in total.

Key Preliminary Findings Education

Demographics

 **67%**  **33%**

Average age **31** years old

 **37%** of family members are children under 18

 **62%** of families have children

 **4%** of families have an either pregnant or lactating woman in composition

Proportion of individuals by age groups

Proportion of families by oblast of origin

Oblast of origin	Community	RAC	Overall
Odessa	53%	59%	54%
Mykolaiv	15%	22%	16%
Kyiv city	10%	3%	10%
Kharkov	6%	4%	6%
Kherson	3%	1%	2%

Women were found to comprise the highest proportion of family members (67%).

Almost half of all household members (49%) were found to be adults between 18 and 59 years old, followed by those above the age of 60 (14%).

Population residing in RACs (49%) was found to comprise a higher proportion of individuals under the age of 18, compared to the population outside RACs (37%).

Of all families, 8% of families reported moving to another oblast in Ukraine between the beginning of war and coming to Moldova

Education

Proportion of school-aged children who have applied to be enrolled to school, by age group (n=98)

Sixteen percent (16%) of the school-aged children from the interviewed families were found to be enrolled in school in Moldova, at the time of the interview. This is of a total of 668 school-aged children part of the sample. Data is weighted.

Proportion of school-aged children who are enrolled to school and started attending school (n=98)

Proportion of school-aged children found to experience barriers when enrolling to school (n=98)

Education

Proportion of school-aged children who were found to be not enrolled in school at the moment of the interview, by reason for not enrolling (n=565)

Choices	3-6	7-10	11-15	16-17	Overall
Preference for accessing Ukrainian learning online platforms	14%	80%	81%	75%	61%
Did not want to enroll this child in school	19%	1%	1%	3%	6%
Intention to move soon	13%	3%	1%	0%	5%
Language barrier	4%	3%	1%	0%	3%
Lack of inclusive schools	2%	1%	1%	8%	2%
Space in school not available	5%	0%	1%	0%	2%
Too young	3%	1%	0%	0%	1%
Waiting for a response to the application	3%	0%	1%	3%	1%
Lack of schools in accessible distance	2%	0%	0%	3%	1%
Errors with application	1%	0%	0%	0%	0%
Do not know	35%	13%	13%	8%	19%

Of the 84% of the children who were not enrolled in school in Moldova at the moment of the interview, 61% of them were found to not be enrolled due to a preference to access online platforms in Ukraine. Preference for Ukraine online learning platforms seemed to be case for older school-aged children, whereas the younger school-aged children were found not be enrolled in school due to personal preference of the caregiver (19%), preference for the Ukrainian online platforms (14%) and intention to move soon (13%)

Next Steps

Dates	Activity
end June – mid July	Interactions with the working groups and other interest government and humanitarian actors
end July	Factsheet with findings
end July	Final presentation of findings
August	Draft report with findings
