REACH Key Informant Survey
Basic Service Units data: Data Sources

The information presented cannot be guaranteed as an exhaustive picture of the situation as it is not based on a census of the refugee population. The predominant types displayed here should be interpreted with caution as their interpretation largely depends on an unknown population size at the Basic Service Unit level. The present map is not intended to be used for population related purposes. It is to be interpreted by the refugee community. Thus the data from this assessment can be used to discover characteristic patterns but is not legally valid for case based decisions.

For humanitarian relief purpose only
