

Basirma Camp Profile: Inter-Sector/Agency Interventions 1/2 December 2015

Geographic Snapshot and Contextual Background

GPS coordinates : 36.495447 44.340316

Region and State : Shaqlawa, Erbil. KR - Iraq

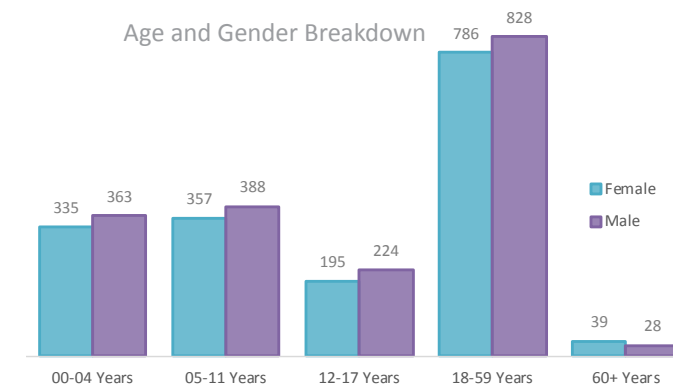

UNHCR/D. El Fiki

Camp Registered Population: 3,543 persons

Pattern in Population Change: The camp receives new arrivals from Kobane since October 2014

Areas of Origin: Majority are Kurdish from Qamishli and Hassaka in Syria

Age and Gender Breakdown

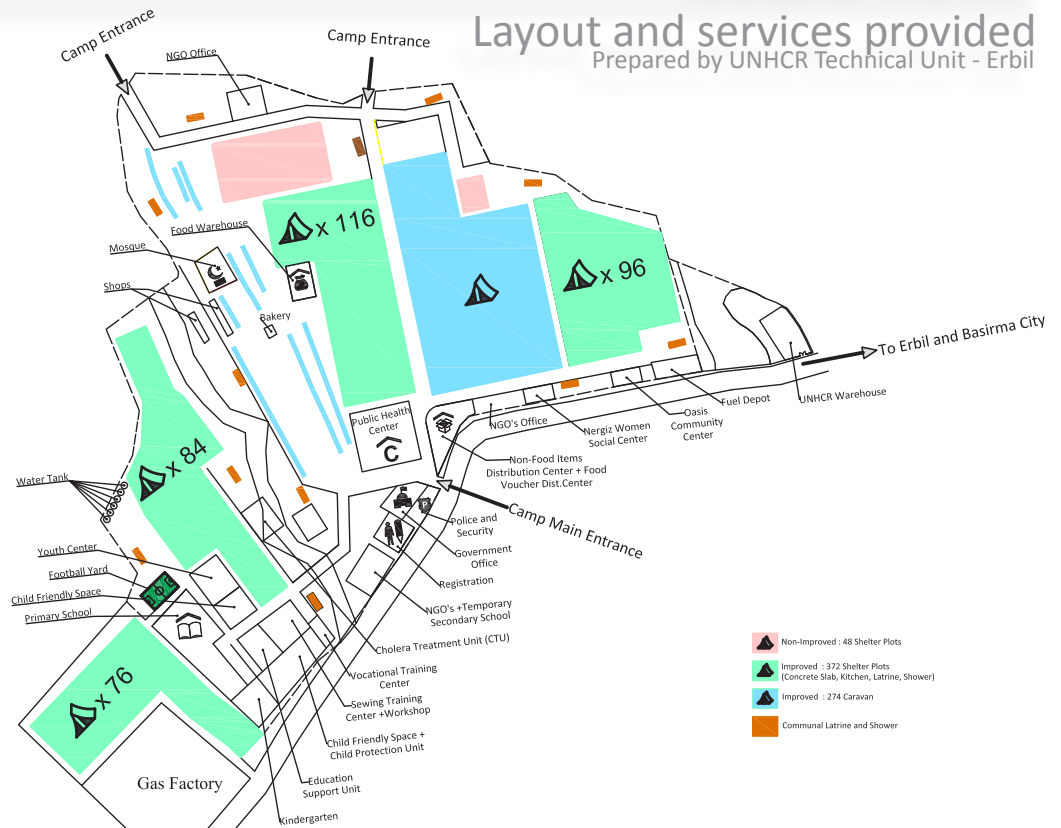

Inter-Sector/Agency Interventions

Sectors	Indicators	Value	Indicators	Value
	# of Syrian refugees registered in 2015	298	% of refugees with updated registration records including iris scan enrolment	83%
	<p>Two families, including three primary school teachers, travelled to Europe. Husband and wife are both teachers in the primary school. It became challenging to see more teachers leaving when number of students increasing, particularly at primary school stage. UNHCR managed to include additional refugees into WFP voucher distribution list, based on protection concerns. UNHCR and Partners conducted FGDs on smuggling to Europe. Key messages to raise awareness on risks associated with smuggling were developed.</p>			
	# of individuals who receive food assistance in voucher	2,360	<p>The introduction of targeting to camps around Iraq at the end of 2015 meant that the number of beneficiaries was substantially reduced in most camps. WFP was forced to introduce targeting in order to reach the most vulnerable beneficiaries with limited funding.</p>	
	# & (%) of children enrolled in school	828 (93%)	# of teachers trained and education personnel trained	
	<p>Delivery of educational and learning materials to all students and 26 kerosene lamps for the school.</p>			
	1 health center for 10,000 persons	Yes	1-4 consultations/ person/ year	7.5
	<p>Health services continue to be provided by DoH with support from UN partners. UPP supported provision MHPSS services. Oral Cholera Vaccine (OCV) campaign has been conducted.</p>			

Size of camp area:
150,000 m²
Planned capacity (approximately):
3,525 persons

Layout and services provided
Prepared by UNHCR Technical Unit - Erbil

Inter-Sector/Agency Interventions

Sectors	Indicators	Value	Indicators	Value
	Accumulative # of HHs receiving emergency shelter	25	Accumulative # of HHs receiving upgraded shelter	693

The construction of all shelter units is complete however 76 constructed shelter units are yet to be occupied as construction of WASH facilities is not complete. 274 pre-fab units continue to be occupied and refugee families have modified the units in terms of flooring and partition. Site improvement works related to drain and retaining walls have been completed. Families who have moved to upgraded shelter have already been started constructing more durable shelter with concrete bricks and corrugated iron sheet.

	# of HHs receiving core relief items for new arrivals and replenishment old items	221	accumulative # of households receiving winter support (200 lit. kerosene for heating and CRI)	720
--	-----------------------------------------------------------------------------------	-----	-----------------------------------------------------------------------------------------------	-----

Core Relief Items (CRIs) were distributed to newly arrived refugees, newly married, scabies infected, protection cases and during emergency response, such as rain or fire. As a part of winter assistance (400 lit. of kerosene/family/season), families living in the camp received 240 lit. of kerosene and kerosene jerry cans. The remaining 160 lit. will be distributed in January and February 2016 and about 78 families, based on their needs, were distributed plastic sheets, tent insulation kits, blankets and stoves.

	Liters of water/person/day: 20 (min. standard)	60	Persons per shower: <20 (min. standard)	9
	Persons per latrine: <20 (min. standard)	7		

Potable water available is only 25 ltr/person/day, supplied through water trucking, as borehole water is brackish. A Reverse Osmosis unit is under installation to solve this problem. Regular hygiene promotion continued with all the camp residents and children, with cholera messaging prioritised and Global Hand Washing Day and World Toilet Day marked. Construction of sanitation facilities in the caravan is ongoing and regular garbage collection, desludging, cleaning of communal latrines and cleaning campaigns continued.
