Areas of Origin: Majority are Kurdish from Qamishli in Syria

Age and Gender Breakdown

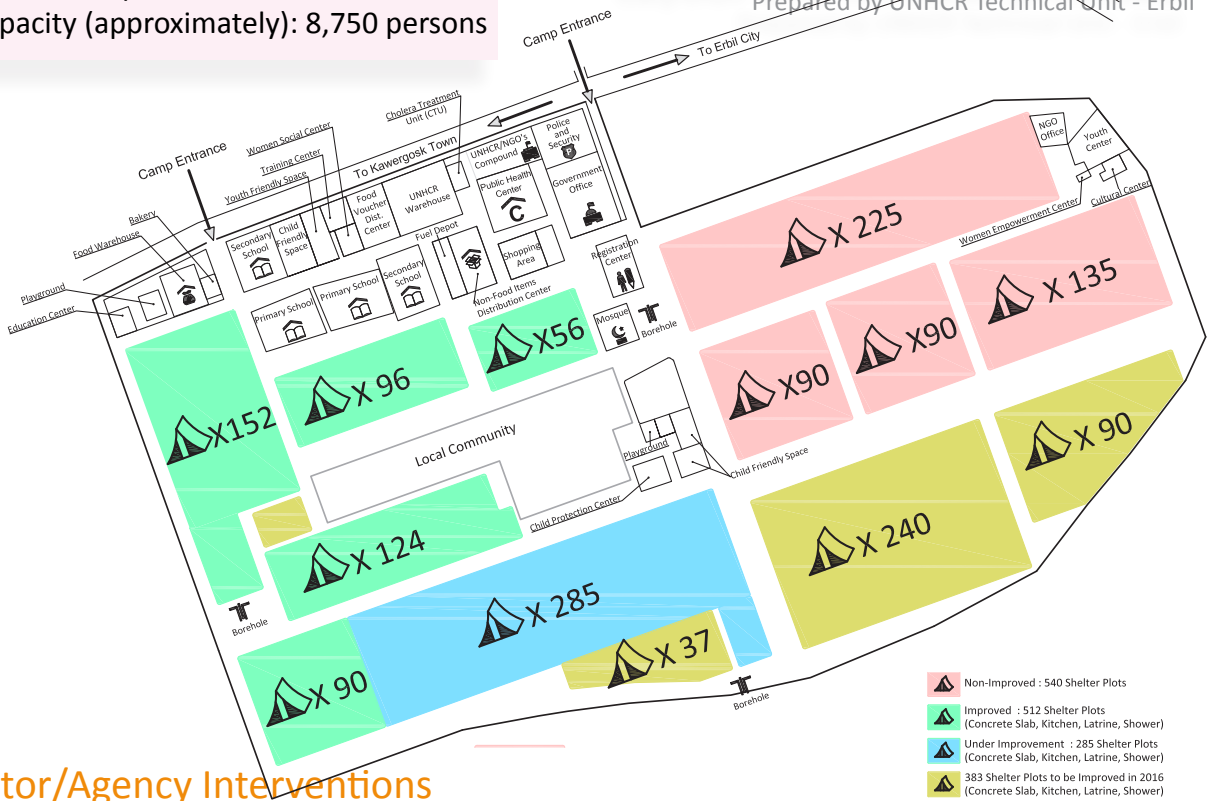

Inter-Sector/Agency Interventions

Sectors	Indicators	Value	Indicators	Value
	# of Syrian refugees registered in 2015	786	% of refugees with updated registration records including iris scan enrolment	80%
	<p>Child Marriage campaign was finalized in Erbil governorate. Key community leaders, women, girls, health workers, Police Officer, teachers, Lawyers and NGO Partners have participate effectively to make successful. UNHCR managed to include additional refugees into WFP voucher distribution list, based on protection concerns. UNHCR and Partners conducted FGDs on smuggling to Europe. Key messages to raise awareness on risks associated with smuggling were developed.</p>			
	# of individuals who receive food assistance in voucher	6,113	<p>In July, food voucher value was \$19/person. In August and September, according to the targeting system, 29% of families are non-eligible for food assistance, 1% (severely and moderately food insecure) received food voucher value \$19/month/person and 70% (marginally food insecure) received voucher value \$10/month/person.</p>	
	<p>Supervisor taught full time as substitute teacher at the formal school for Basic Education. The head teachers in formal school asked partners to provide substitute teachers since they had a shortage of teaching staff. Delivery of educational and learning materials to all students and 25 kerosene lamps for the school.</p>			
	# & (%) of children enrolled in school	1,744 (84%)	<p>Supervisor taught full time as substitute teacher at the formal school for Basic Education. The head teachers in formal school asked partners to provide substitute teachers since they had a shortage of teaching staff. Delivery of educational and learning materials to all students and 25 kerosene lamps for the school.</p>	
	# & (%) of children registered are enrolled in school	Yes	1-4 consultations/ person/ year	4.7
	<p>Health services continue to be provided by IMC and DoH with support from UN partners. MSF-F and UPP supported provision MHPSS services. IMC has handed over the PHC/Out Patient Department (OPD) to DoH by end of December. DoH-Erbil will run the PHC (OPD services) with financial support from UNHCR in 2016. By now, all the PHC is handed over to DoH and its supported by other UN agencies. Oral Cholera Vaccine (OCV) campaign has been conducted.</p>			

Size of camp area : 419.000m²
 Planned capacity (approximately): 8,750 persons

Layout and services provided

Prepared by UNHCR Technical Unit - Erbil

Inter-Sector/Agency Interventions

Sectors	Indicators	Value	Indicators	Value
	Accumulative # of HHs receiving emergency shelter	1,655	Accumulative # of HHs receiving upgraded shelter	486

The camp is crowded as number of refugee families is more than the planned capacity. With no new camp or extension of existing camp planned, some of the refugee families will continue to live in emergency shelter. As planned, the construction of 285 improved shelter units (Shelter, WASH, water network and electricity works) has been completed. Relocation of families will be in 2016 after the completion of construction of roads and open channel.

	# of HHs receiving core relief items for new arrivals and replenishment old items	254	# of households receiving winter support (200 lit. kerosene for heating and CRI)	2,049
--	---	-----	--	-------

Core Relief Items (CRIs) were distributed to newly arrived refugees, newly married, scabies infected, protection cases and during emergency response, such as rain or fire. As a part of winter assistance (400 lit. of kerosene/family/season), families living in the camp received 240 lit. of kerosene and kerosene jerry cans. The remaining 160 lit. will be distributed in January and February 2016 and 975 families, based on their needs, received plastic sheets.

	Liters of water/person/day: 20 (min. standard)	136	Persons per shower: <20 (min. standard)	20
	Persons per latrine: <20 (min. standard)	7		

Average water supply had a significant decrease from the 3rd quarter. This is mainly due to the end of the extreme summer season, which allowed reduction of water trucking to meet demand. Water network improvement for the temporary area progressed well, and was near completion by quarter end. Construction of sanitation facilities for 285 new shelter plots was completed, while regular garbage collection, desludging and cleaning campaigns continued. The WASH committee was reactivated and trained and regular hygiene promotion continued with all camp residents. Given the country wide cholera outbreak, cholera prevention and promotion of the Oral Cholera Vaccination (OCV) campaign were priority messages. Global Hand Washing Day and World Toilet Day were marked.
