

# Health and Nutrition Sector Working Group

Sandra Harlass,  
UNHCR Senior Public Health Officer

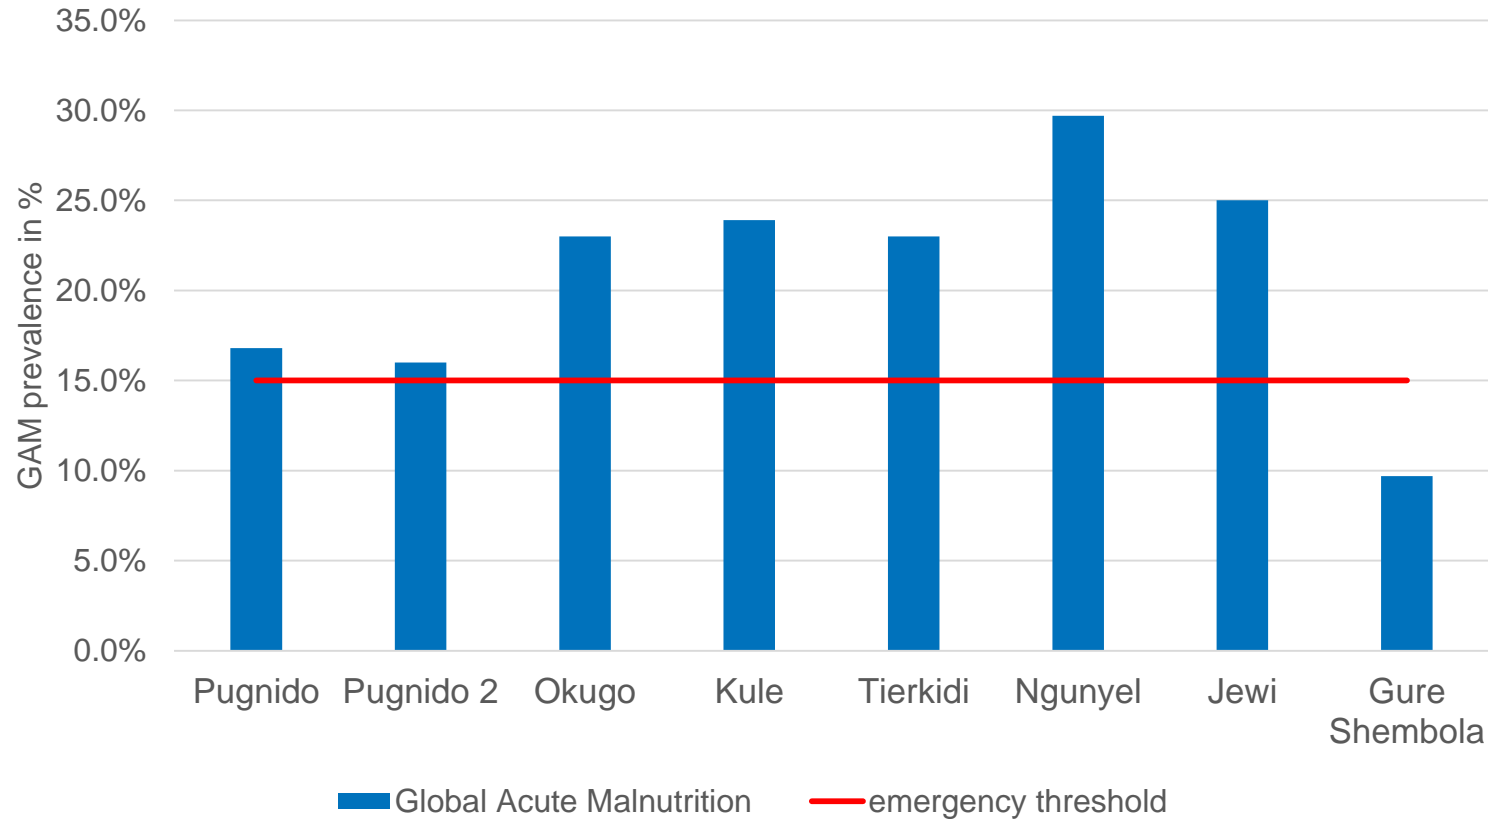

## 2017 achievements - health

	Achievement	Target
Under 5 mortality rate	0.2 deaths/ 1,000/ month	<1.5 deaths/ 1,000/ month
Health facility utilization rate	1.5 consultation/ refugee/ year	> 1 consultation/ refugee/ year
Health facility coverage	1 facility: 19,000 refugees	1: 10,000
Patients referred to secondary health care	925	8,000
Skilled delivery attendance	97%	> 90%

# 2017 achievements - nutrition

Global Acute Malnutrition Prevalence 2017 (children 6-59 months)

- Nutrition surveys conducted: 8 (target: 5)
- GAM prevalence in children 6-59 months: 22.1% (target: <15%)

## Challenges

- Limited number of health facilities, gaps in drug provision and referral
- High prevalence of communicable diseases despite prevention measures
- Overlap of community outreach activities
- Persistently high global acute malnutrition, underlying causes poorly understood

# Priorities for 2018

- Improve access to and quality of health care services
  - Construction/maintenance of health facilities
  - Capacity building
  - Balanced score card assessments
- Enhance access to treatment for non-communicable diseases
- Enhance health & nutrition data management
  - mobile HIS, Last Mile Mobile Solution

## Priorities 2018

Strengthen prevention of global acute malnutrition in children under 5

- Nutrition causal analysis, Infant and Young Child Feeding Framework, provision of complementary food

Strengthen cooperation with Ministry of Health/ Regional Health Bureaus and development partners

**Thank you!**
